

STATE PROFILE REPORT

08.13.2021

ALABAMA

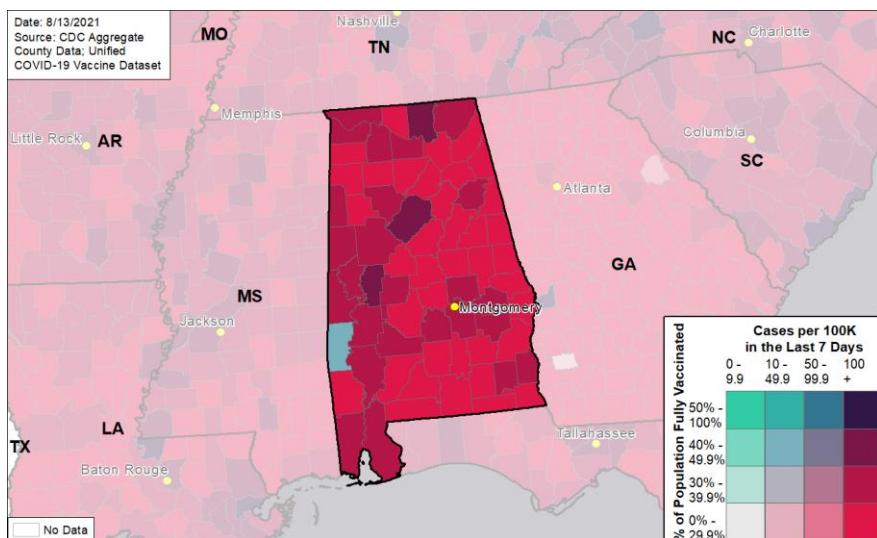

STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	501	+39%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	24.7%	+1.5%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	19.7	+32%
RATE OF NEW COVID-19 DEATHS PER 100,000	3.4	+154%
COMMUNITY TRANSMISSION LEVEL	HIGH TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	2,256,357 people	46.0% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	2,161,514 people	56.7% of 18+ pop.
PEOPLE FULLY VACCINATED	1,725,039 people	35.2% of total pop.
PEOPLE 18+ FULLY VACCINATED	1,678,291 people	44.0% of 18+ pop.

SARS-CoV-2 Variants of Concern

- The following proportions of variants of concern have been identified in [Alabama](#): B.1.1.7 (Alpha, 12.3%), B.1.617.2 (Delta, 72.0%), P.1 (Gamma, 2.5%)

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

* Indicates absolute change in percentage points.

** Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

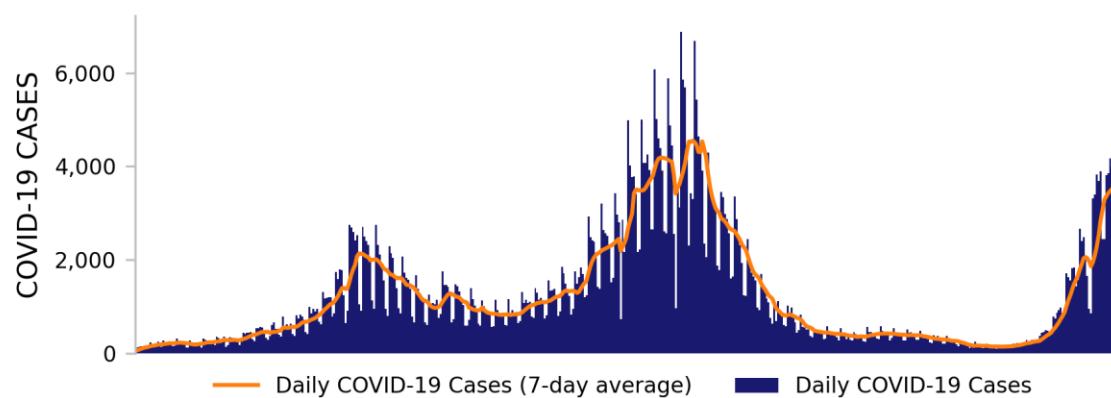

DATA SOURCES**Note:** Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.**Cases and Deaths:** State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data is through 8/12/2021; previous week is from 7/30 to 8/5.**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 8/10/2021; previous week is from 7/28 to 8/3. Test volume through 8/6/2021; previous week is from 7/24 to 7/30.**Admissions:** Unified Hospitals Dataset in HHS Protect. Data is through 8/11, previous week is from 7/29 to 8/4.**Shortages:** Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 8/11/2021 for staffing and the week ending 8/11/2021 for supplies.**Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range. **METHODS:** Details available on last two pages of report.

County reporting completeness for Alabama is 91.8%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

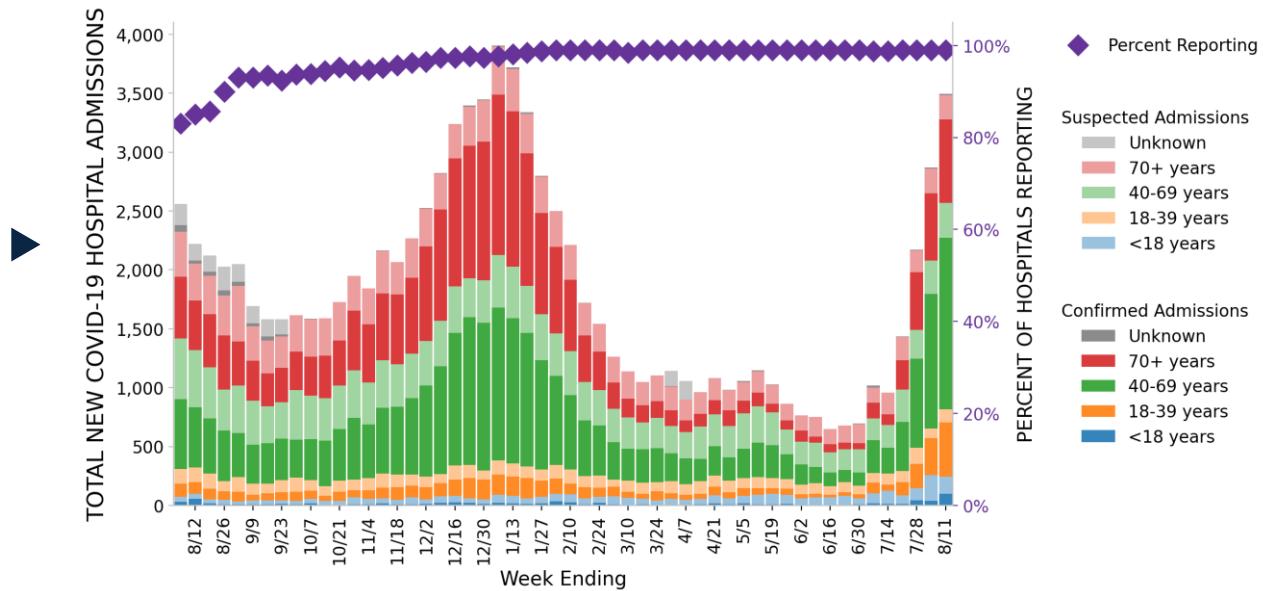

ALABAMA

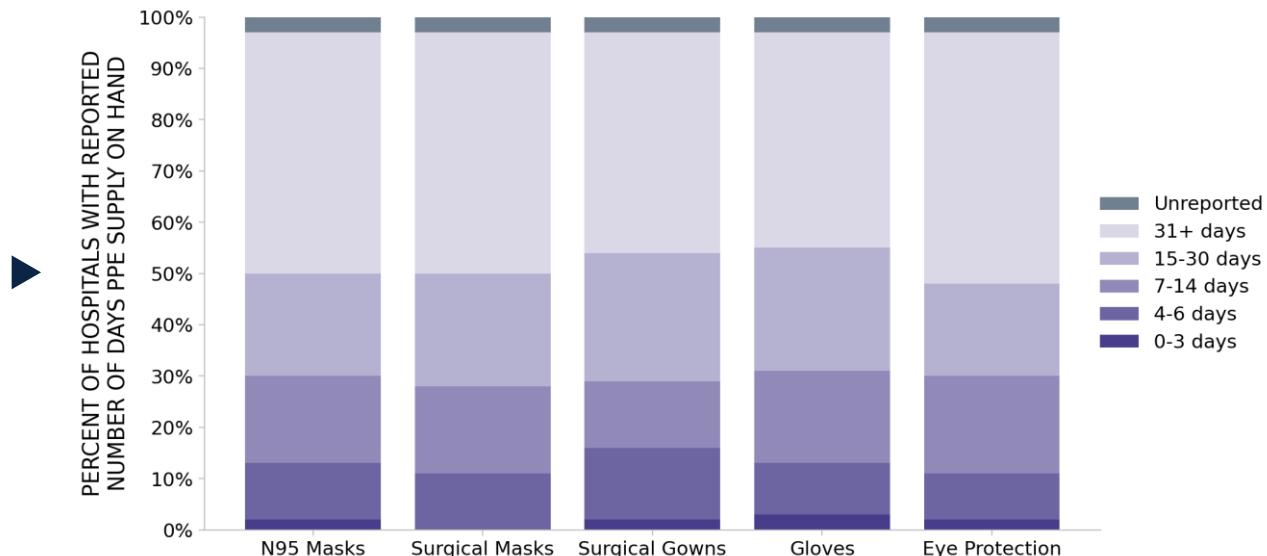

STATE PROFILE REPORT | 08.13.2021

100 hospitals are expected to report in Alabama

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

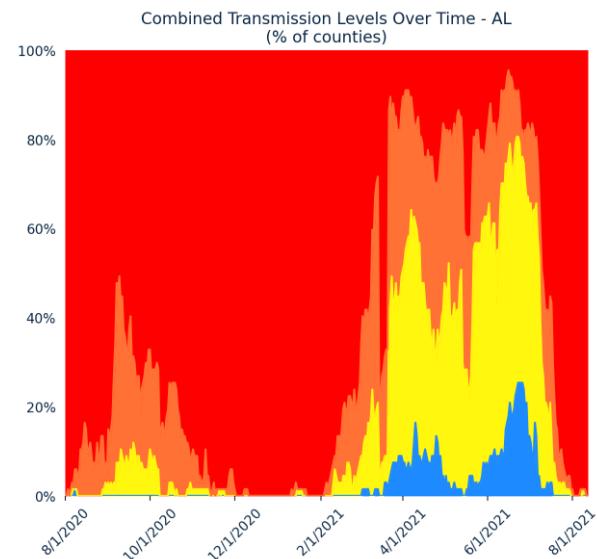

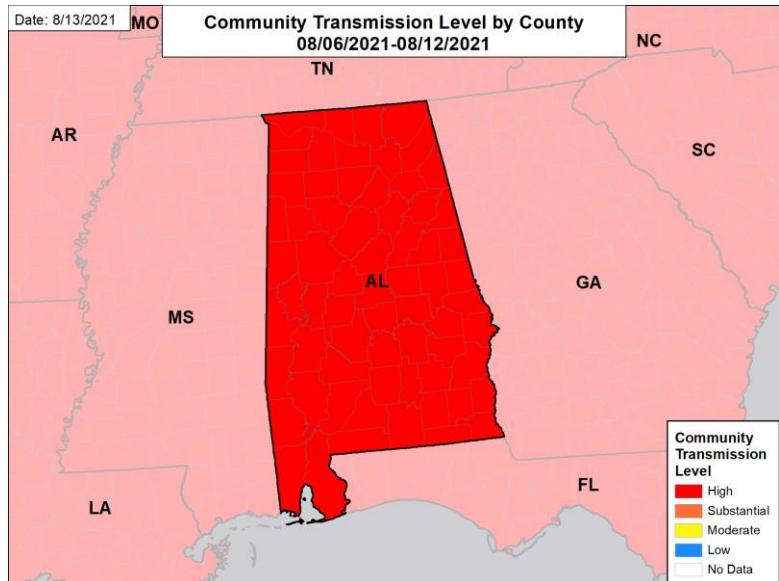

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

ALABAMA

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	0 (0)	67 (0)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (0)	27 (0)

All Red Counties: Mobile, Jefferson, Baldwin, Madison, Shelby, Montgomery, Houston, Lee, Tuscaloosa, Marshall, Etowah, Dale, Coffee, Calhoun, St. Clair, Cullman, Morgan, Limestone, Elmore, Lauderdale, Escambia, Walker, Talladega, DeKalb, Colbert, Autauga, Tallapoosa, Covington, Blount, Geneva, Russell, Chambers, Henry, Monroe, Franklin, Marion, Pike, Jackson, Barbour, Chilton, Clarke, Winston, Washington, Bibb, Butler, Dallas, Randolph, Marengo, Lawrence, Cherokee, Pickens, Crenshaw, Conecuh, Hale, Fayette, Macon, Cleburne, Lamar, Coosa, Clay, Bullock, Perry, Lowndes, Wilcox, Sumter, Greene, Choctaw

All Red CBSAs: Birmingham-Hoover, Mobile, Daphne-Fairhope-Foley, Montgomery, Huntsville, Dothan, Tuscaloosa, Auburn-Opelika, Florence-Muscle Shoals, Albertville, Gadsden, Ozark, Enterprise, Anniston-Oxford, Decatur, Cullman, Atmore, Jasper, Talladega-Sylacauga, Fort Payne, Alexander City, Columbus, LaGrange, Scottsboro, Troy, Eufaula, Selma

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	1 (↓2)	14 (↑2)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (↓3)	11 (↑3)

All Orange Counties: La Paz

All Red Counties: Maricopa, Pinal, Pima, Mohave, Yavapai, Yuma, Coconino, Navajo, Cochise, Gila, Apache, Graham, Santa Cruz, Greenlee

All Red CBSAs: Phoenix-Mesa-Chandler, Tucson, Lake Havasu City-Kingman, Prescott Valley-Prescott, Yuma, Flagstaff, Show Low, Sierra Vista-Douglas, Payson, Safford, Nogales

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

All Red CBSAs: Los Angeles-Long Beach-Anaheim, Riverside-San Bernardino-Ontario, San Diego-Chula Vista-Carlsbad, San Francisco-Oakland-Berkeley, Sacramento-Roseville-Folsom, San Jose-Sunnyvale-Santa Clara, Bakersfield, Fresno, Oxnard-Thousand Oaks-Ventura, Stockton, Modesto, Santa Rosa-Petaluma, Vallejo, Visalia, Santa Maria-Santa Barbara, San Luis Obispo-Paso Robles, Yuba City, Eureka-Arcata, Merced, Truckee-Grass Valley, Hanford-Corcoran, Redding, Santa Cruz-Watsonville, Chico, Ukiah, Madera, El Centro, Crescent City, Clearlake, Sonora, Napa, Red Bluff, Susanville

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

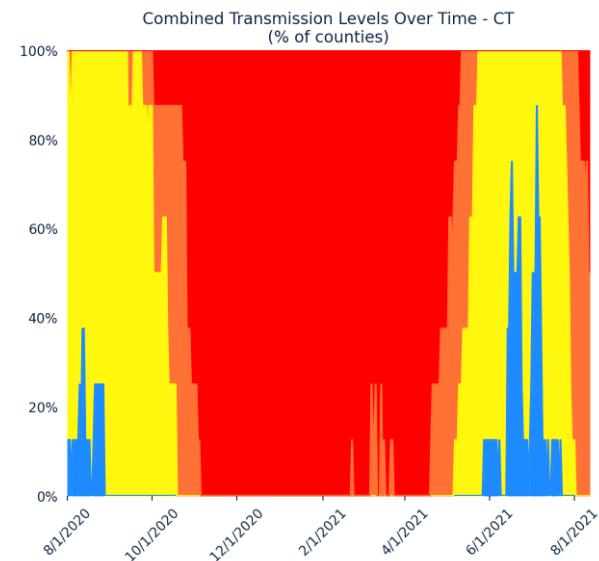

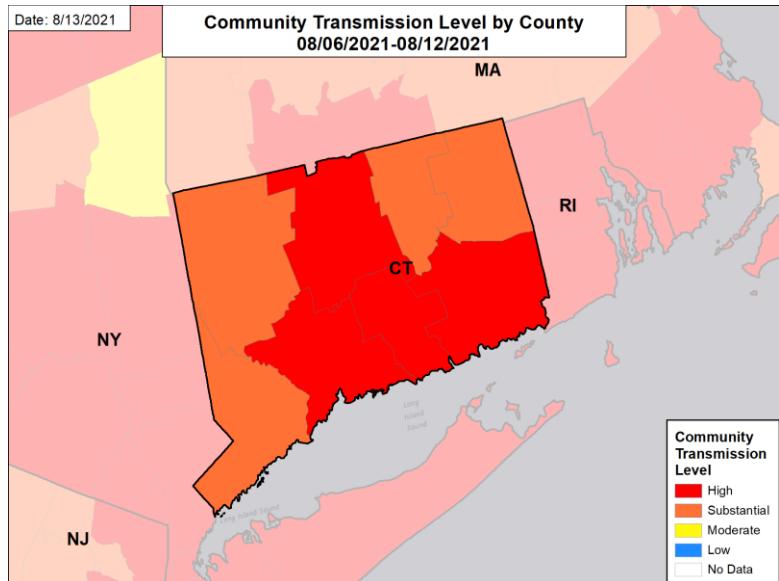

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

DELAWARE

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	0 (↓1)	3 (↑1)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (↓1)	3 (↑1)

All Red Counties: New Castle, Sussex, Kent

All Red CBSAs: Philadelphia-Camden-Wilmington, Salisbury, Dover

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

County reporting completeness for Florida is 98.6%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

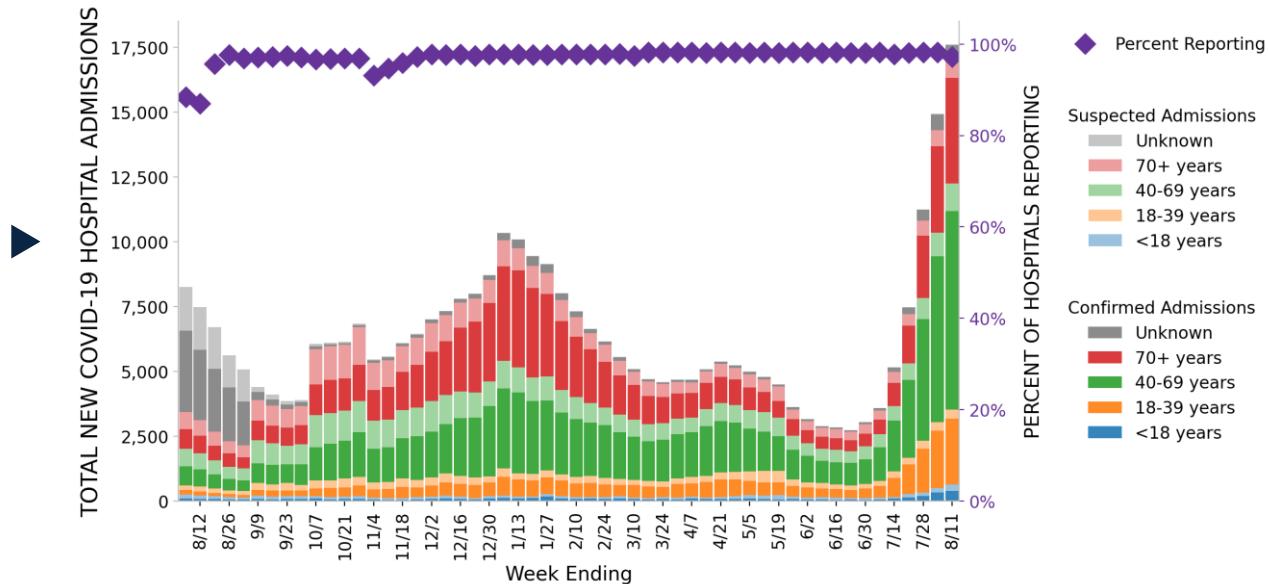

FLORIDA

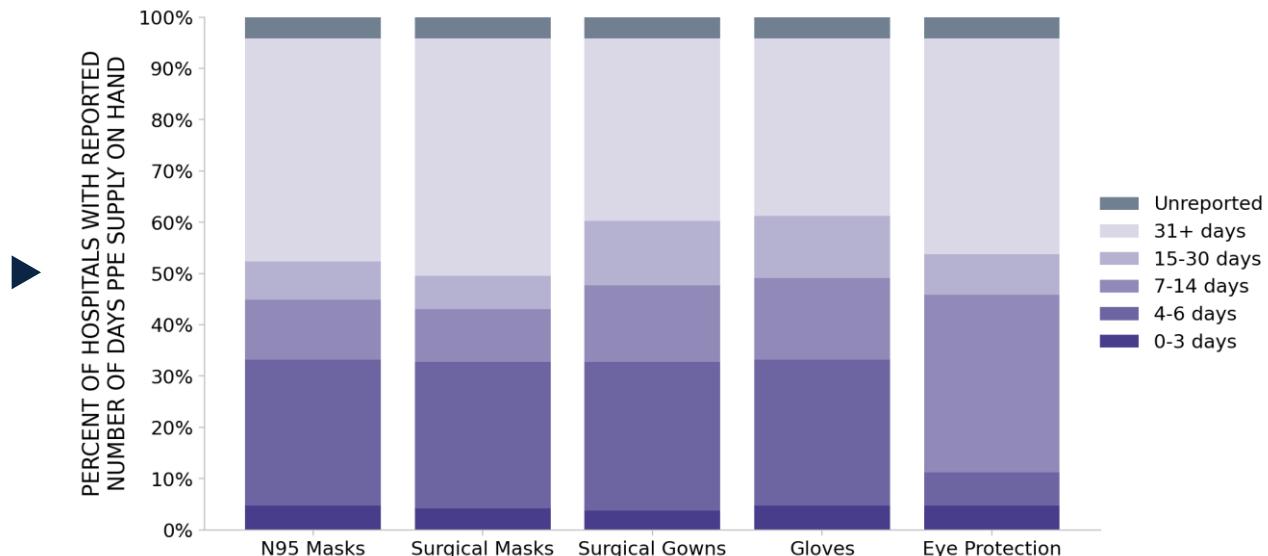

STATE PROFILE REPORT | 08.13.2021

214 hospitals are expected to report in Florida

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

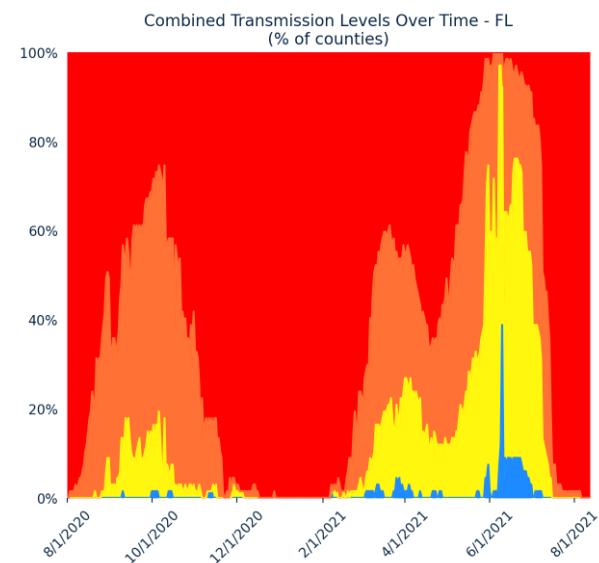

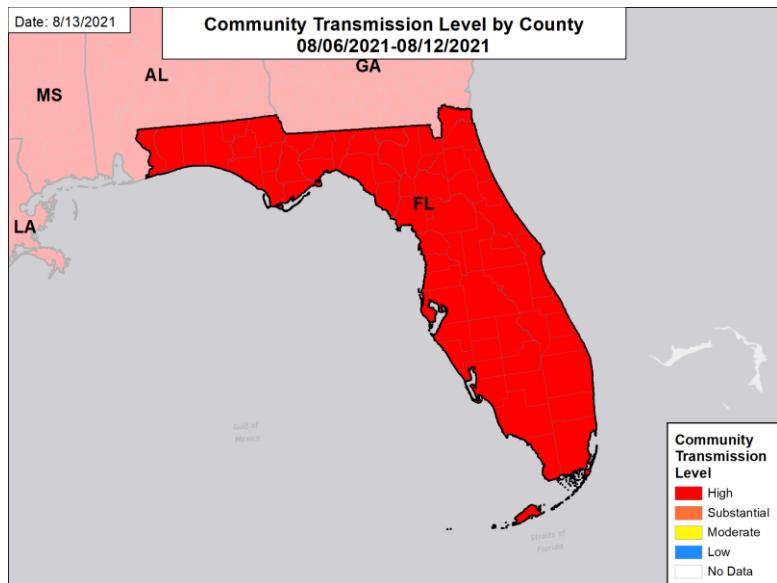

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

FLORIDA

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	0 (↓1)	67 (↑1)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (0)	29 (0)

All Red Counties: Miami-Dade, Broward, Orange, Hillsborough, Duval, Palm Beach, Polk, Pinellas, Lee, Brevard, Pasco, Volusia, Seminole, Osceola, Marion, Lake, Manatee, Collier, Escambia, Sarasota, St. Lucie, Leon, St. Johns, Bay, Clay, Alachua, Hernando, Okaloosa, Santa Rosa, Indian River, Columbia, Citrus, Nassau, Charlotte, Flagler, Martin, Putnam, Highlands, Walton, Jackson, Sumter, Monroe, Suwannee, Levy, Baker, Gadsden, Wakulla, Bradford, Okeechobee, Washington, Hendry, Hardee, Gulf, Madison, DeSoto, Gilchrist, Holmes, Calhoun, Union, Dixie, Hamilton, Franklin, Liberty, Taylor, Jefferson, Lafayette, Glades

All Red CBSAs: Miami-Fort Lauderdale-Pompano Beach, Tampa-St. Petersburg-Clearwater, Orlando-Kissimmee-Sanford, Jacksonville, Lakeland-Winter Haven, Cape Coral-Fort Myers, North Port-Sarasota-Bradenton, Deltona-Daytona Beach-Ormond Beach, Palm Bay-Melbourne-Titusville, Pensacola-Ferry Pass-Brent, Port St. Lucie, Tallahassee, Ocala, Naples-Marco Island, Gainesville, Crestview-Fort Walton Beach-Destin, Panama City, Sebastian-Vero Beach, Lake City, Homosassa Springs, Punta Gorda, Palatka, Sebring-Avon Park, The Villages, Key West, Okeechobee, Clewiston, Wauchula, Arcadia

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021. As of 6/4, Florida is only updating their county case data on Fridays, therefore values for the last week may be an underestimate.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

SARS-CoV-2 Variants of Concern

- The following proportions of variants of concern have been identified in [Georgia](#): B.1.1.7 (Alpha, 14.0%), B.1.617.2 (Delta, 65.1%), P.1 (Gamma, 2.7%)

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

All Red CBSAs: Urban Honolulu, Hilo, Kahului-Wailuku-Lahaina, Kapaa

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

IDAHO

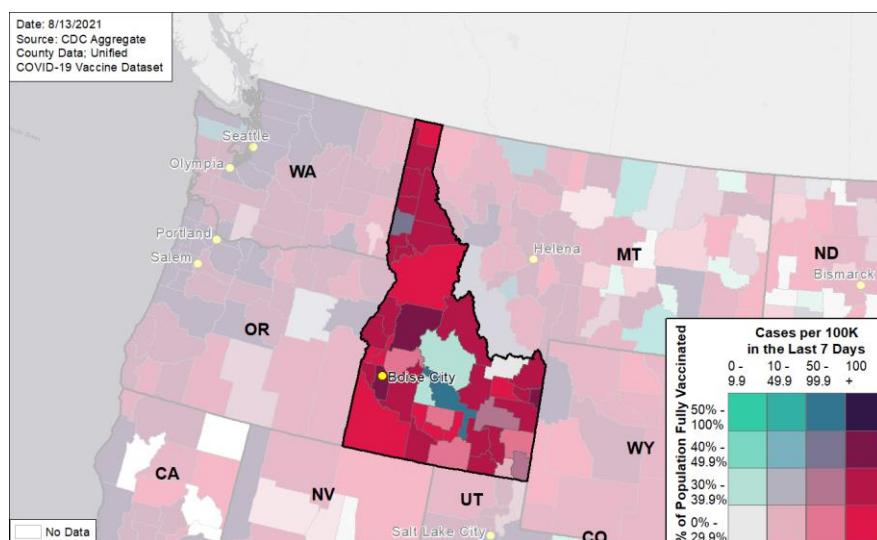

STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	216	+12%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	17.3%	0.0%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	7.9	+49%
RATE OF NEW COVID-19 DEATHS PER 100,000	1.2	+16%
COMMUNITY TRANSMISSION LEVEL	HIGH TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	754,501 people	42.2% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	752,947 people	56.2% of 18+ pop.
PEOPLE FULLY VACCINATED	677,994 people	37.9% of total pop.
PEOPLE 18+ FULLY VACCINATED	677,096 people	50.6% of 18+ pop.

SARS-CoV-2 Variants of Concern

- Genomic surveillance data from Idaho are not available for inclusion in this report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

As of 8/10 Idaho provides vaccine data only for vaccine recipients who are 18 years and older, in line with state laws. COVID-19 vaccination administration data is unavailable for the Idaho population aged less than 18 years.

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

All Red Counties: Sedgwick, Johnson, Shawnee, Wyandotte, Leavenworth, Douglas, Butler, Crawford, Montgomery, Reno, Ford, Saline, Bourbon, Lyon, Atchison, Geary, Riley, Cowley, Labette, Miami, Harvey, Cherokee, Finney, Pottawatomie, Franklin, Linn, Jefferson, Barton, Dickinson, Neosho, McPherson, Ellis, Wilson, Jackson, Allen, Sumner, Nemaha, Pratt, Seward, Osage, Marshall, Kingman, Doniphan, Greenwood, Clay, Cloud, Brown, Coffey, Marion, Ottawa, Wabaunsee, Anderson, Ellsworth, Thomas, Washington, Rice, Barber, Lincoln, Elk, Stevens, Harper, Woodson, Meade, Kiowa, Sherman, Morris, Stafford, Norton, Phillips, Greeley, Ness, Mitchell, Scott, Gray, Wallace, Trego, Clark, Republic, Stanton, Rooks, Chautauqua, Sheridan, Chase, Edwards, Rush, Hamilton, Cheyenne, Wichita, Haskell, Comanche, Hodgeman, Osborne, Morton, Gove, Smith

All Red CBSAs: Kansas City, Wichita, Topeka, Manhattan, Lawrence, Pittsburg, Coffeyville, Hutchinson, Salina, Dodge City, Emporia, Atchison, Winfield, Parsons, Garden City, Ottawa, Great Bend, McPherson, Hays, Liberal, St. Joseph

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

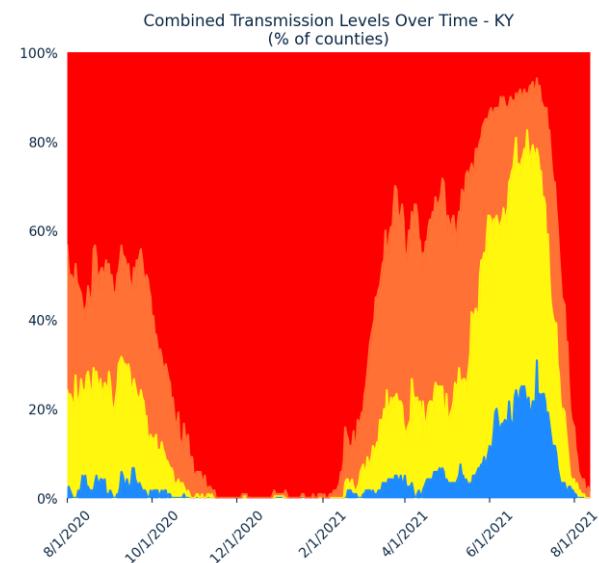

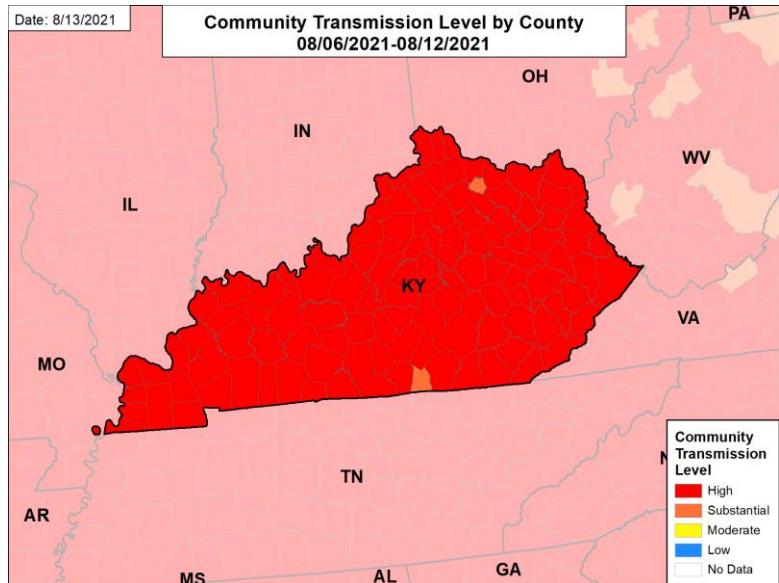

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

LOUISIANA

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY PARISH AND METRO AREA

PARISHES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF PARISHES (CHANGE)	0 (0)	0 (0)	0 (0)	64 (0)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (0)	19 (0)

All Red Parishes: Jefferson Parish, East Baton Rouge Parish, St. Tammany Parish, Lafayette Parish, Orleans Parish, Ouachita Parish, Caddo Parish, Livingston Parish, Tangipahoa Parish, Ascension Parish, Calcasieu Parish, Lafourche Parish, Terrebonne Parish, Rapides Parish, Bossier Parish, Iberia Parish, Vermilion Parish, St. Landry Parish, Acadia Parish, Washington Parish, St. Charles Parish, St. Mary Parish, St. Martin Parish, Avoyelles Parish, St. Bernard Parish, St. John the Baptist Parish, Iberville Parish, Webster Parish, Evangeline Parish, Vernon Parish, Beauregard Parish, De Soto Parish, Lincoln Parish, West Baton Rouge Parish, Morehouse Parish, Natchitoches Parish, East Feliciana Parish, Richland Parish, Concordia Parish, Assumption Parish, Grant Parish, Sabine Parish, St. James Parish, Pointe Coupee Parish, Franklin Parish, Allen Parish, Plaquemines Parish, Jefferson Davis Parish, Union Parish, Caldwell Parish, Winn Parish, LaSalle Parish, Bienville Parish, West Feliciana Parish, Jackson Parish, East Carroll Parish, Claiborne Parish, Catahoula Parish, Madison Parish, St. Helena Parish, West Carroll Parish, Red River Parish, Cameron Parish, Tensas Parish

All Red CBSAs: New Orleans-Metairie, Baton Rouge, Lafayette, Shreveport-Bossier City, Houma-Thibodaux, Monroe, Hammond, Lake Charles, Alexandria, Opelousas, Bogalusa, Morgan City, Minden, Fort Polk South, DeRidder, Ruston, Natchitoches, Natchez, Jennings

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

County reporting completeness for Massachusetts is 89.4%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

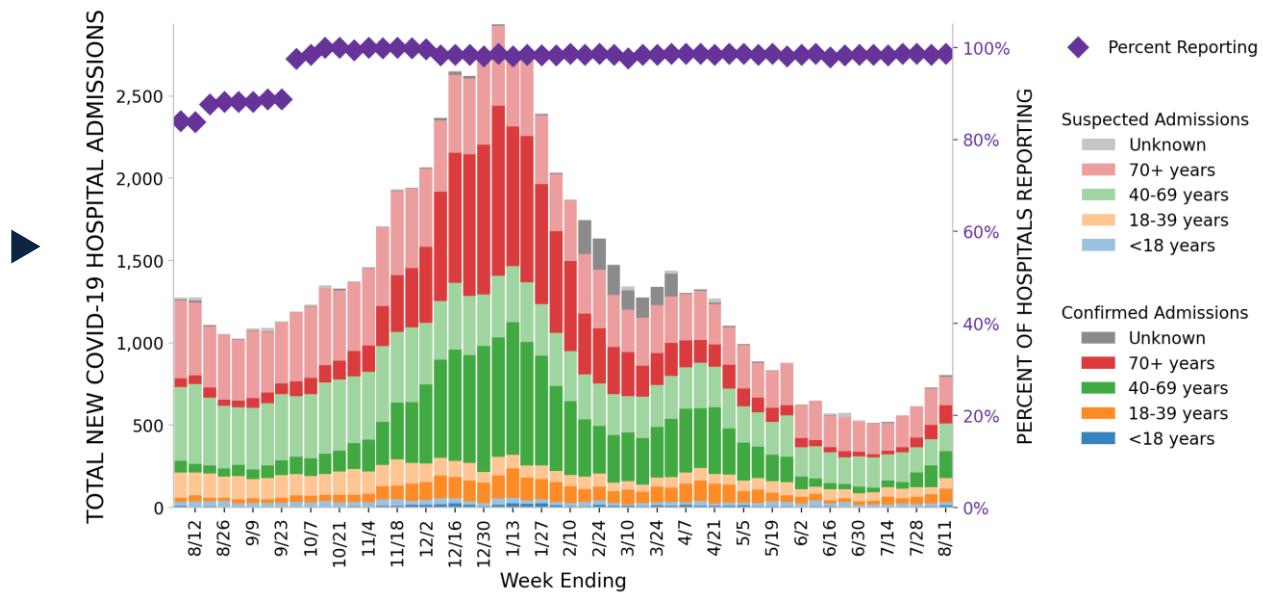

MASSACHUSETTS

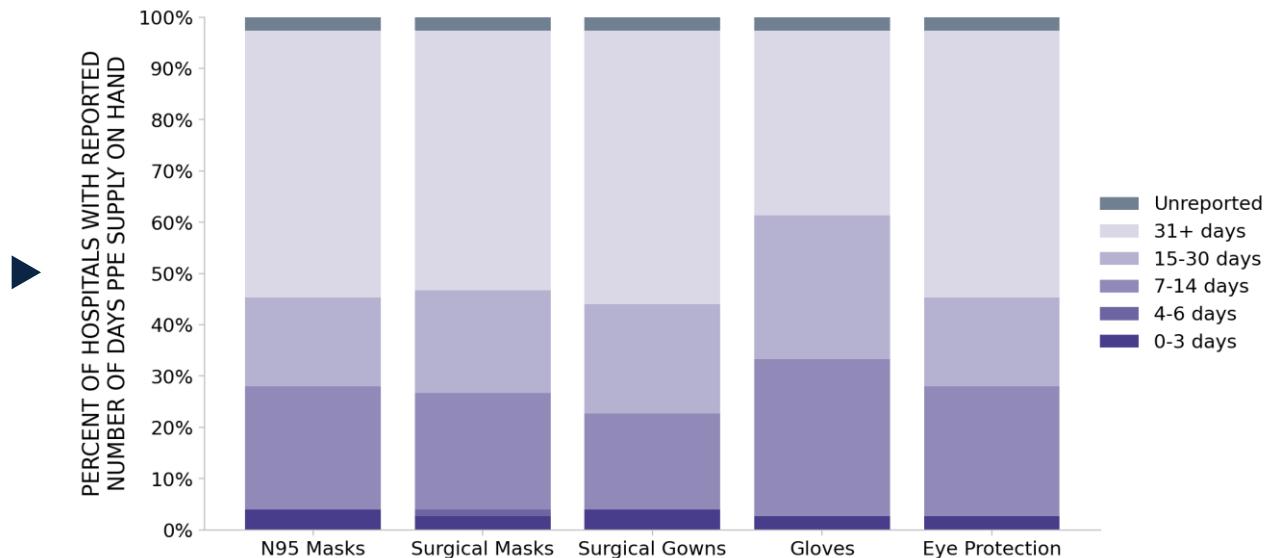

STATE PROFILE REPORT | 08.13.2021

75 hospitals are expected to report in Massachusetts

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

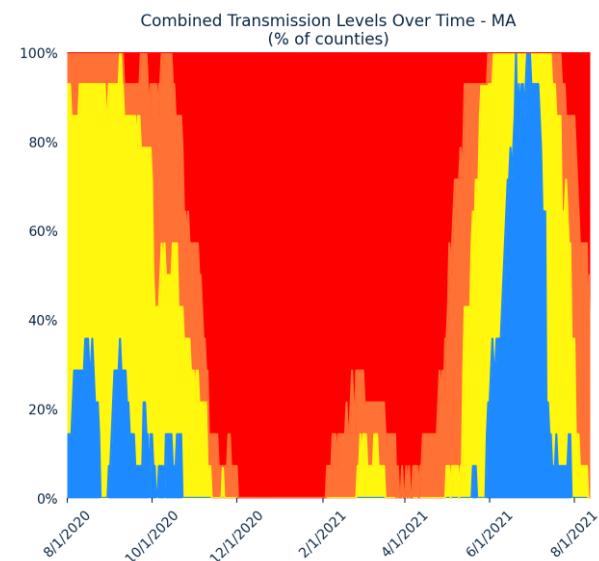

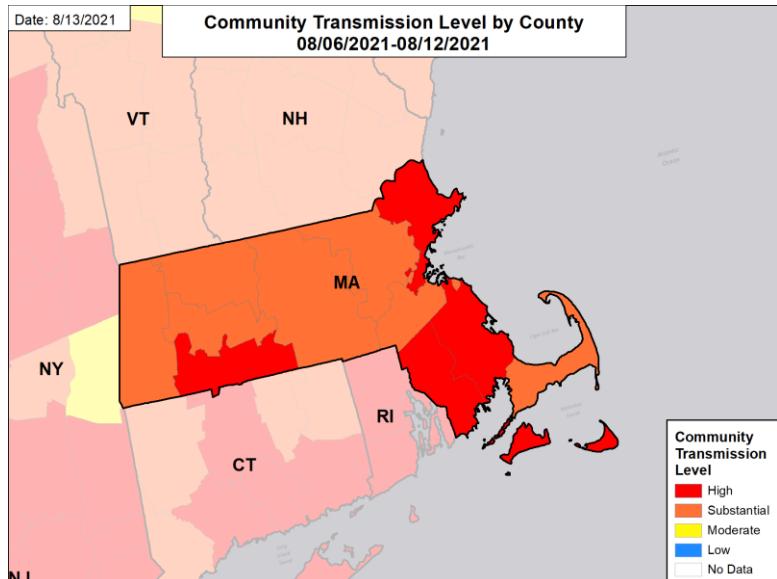

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

MASSACHUSETTS

STATE PROFILE REPORT | 08.13.2021
COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (\downarrow 1)	7 (0)	7 (\uparrow 1)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	3 (\downarrow 1)	4 (\uparrow 1)

All Orange Counties: Middlesex, Worcester, Norfolk, Barnstable, Berkshire, Hampshire, Franklin

All Orange CBSAs: Worcester, Barnstable Town, Pittsfield

All Red Counties: Suffolk, Bristol, Essex, Hampden, Plymouth, Nantucket, Dukes

All Red CBSAs: Boston-Cambridge-Newton, Providence-Warwick, Springfield, Vineyard Haven

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

PERCENT OF 18+ POPULATION FULLY VACCINATED**PERCENT OF 65+ POPULATION FULLY VACCINATED****DATA SOURCES**

County reporting completeness for Minnesota is 94.5%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

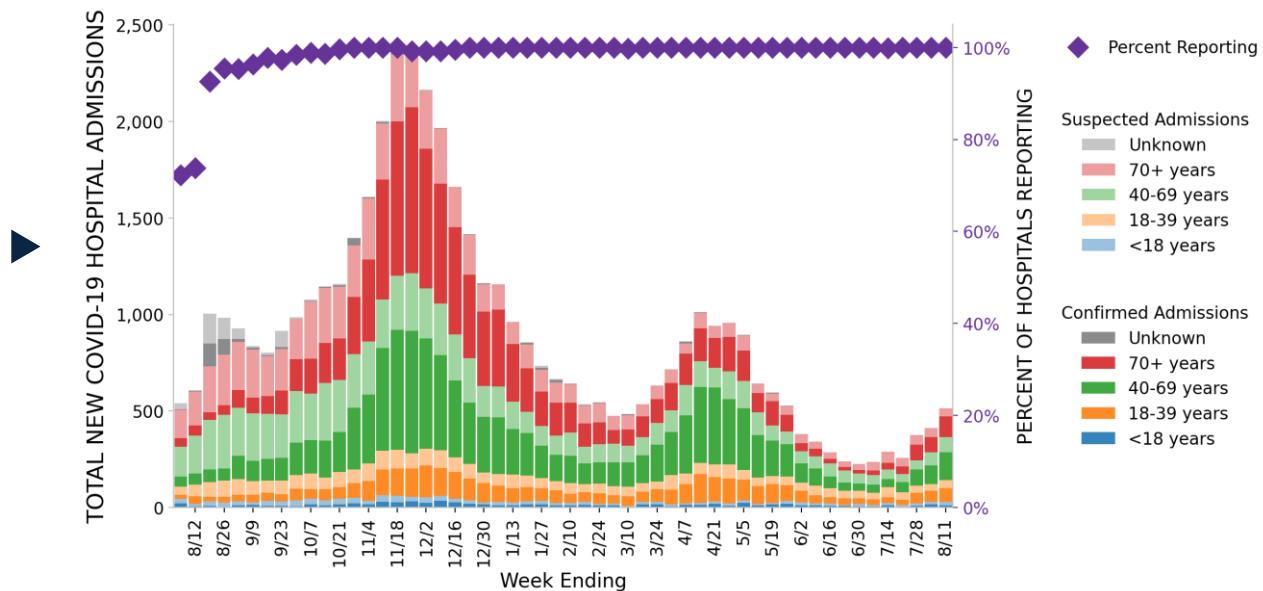

MINNESOTA

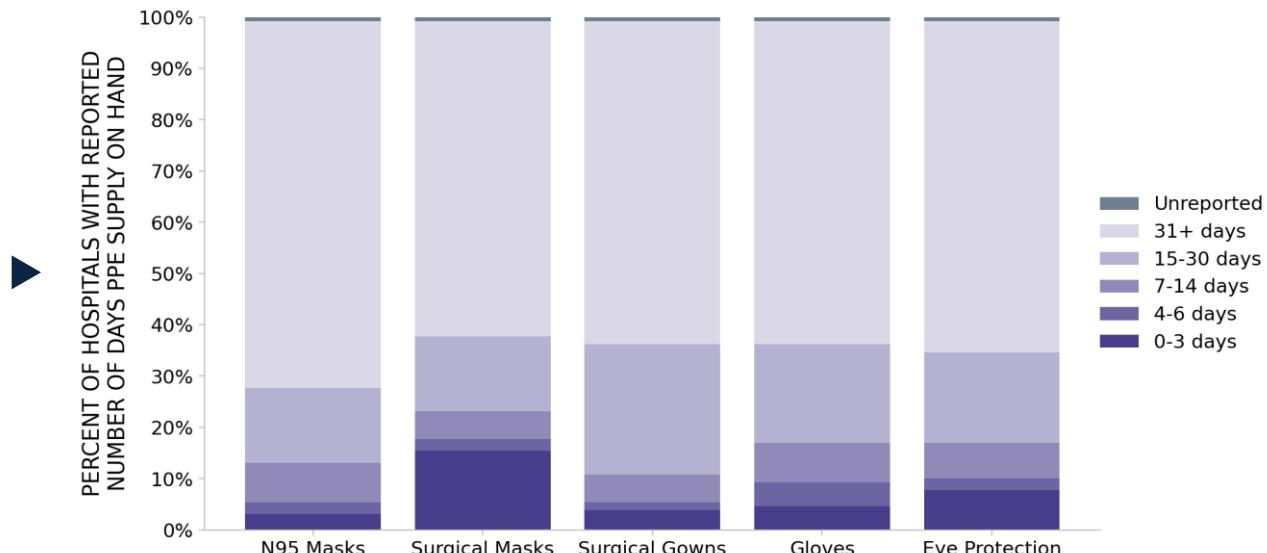

STATE PROFILE REPORT | 08.13.2021

130 hospitals are expected to report in Minnesota

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

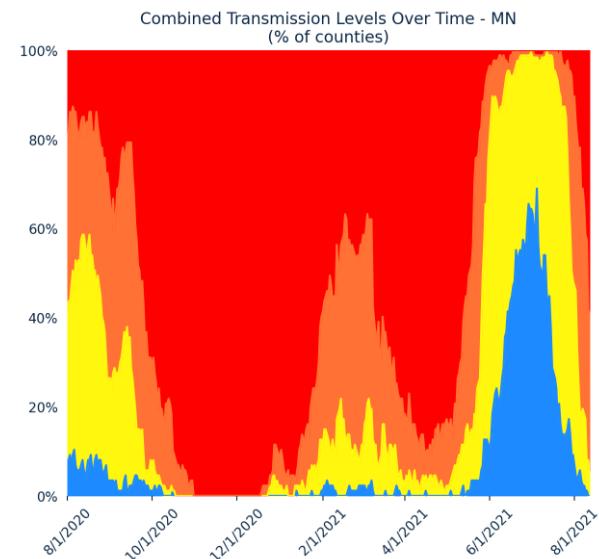

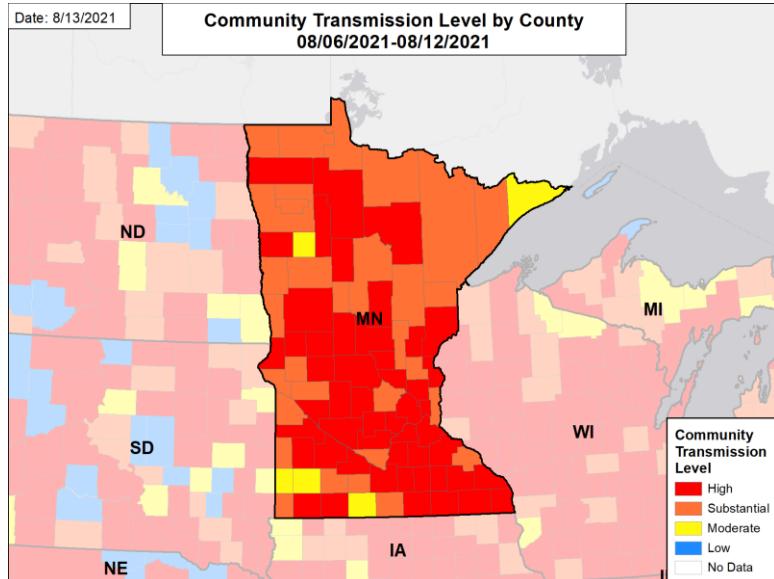

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

All Orange Counties: Washington, St. Louis, Wright, Clay, Isanti, Carlton, Polk, Nicollet, Becker, Cass, Wabasha, Mille Lacs, Roseau, Pennington, Aitkin, Faribault, Wadena, Watonwan, Lake, Swift, Koochiching, Rock, Cottonwood, Stevens, Wilkin, Lac qui Parle, Lincoln, Red Lake, Kittson, Lake of the Woods, Big Stone

All Orange CBSAs: Duluth, Mankato, Grand Forks, Wahpeton

All Red Counties: Hennepin, Ramsey, Dakota, Anoka, Olmsted, Scott, Stearns, Sherburne, Carver, Kandiyohi, Otter Tail, Winona, Chisago, Crow Wing, Mower, Beltrami, Rice, Steele, Blue Earth, Goodhue, Freeborn, Douglas, Itasca, McLeod, Dodge, Waseca, Pine, Benton, Le Sueur, Fillmore, Brown, Morrison, Lyon, Houston, Meeker, Nobles, Todd, Hubbard, Sibley, Redwood, Kanabec, Renville, Marshall, Jackson, Norman, Clearwater, Pope, Chippewa, Yellow Medicine, Grant, Traverse

All Red CBSAs: Minneapolis-St. Paul-Bloomington, Rochester, St. Cloud, Willmar, Brainerd, Fergus Falls, Winona, Austin, Bemidji, Faribault-Northfield, Owatonna, Red Wing, Albert Lea, Alexandria, Grand Rapids, Hutchinson, Fargo, New Ulm, Marshall, La Crosse-Onalaska, Worthington

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

MONTANA

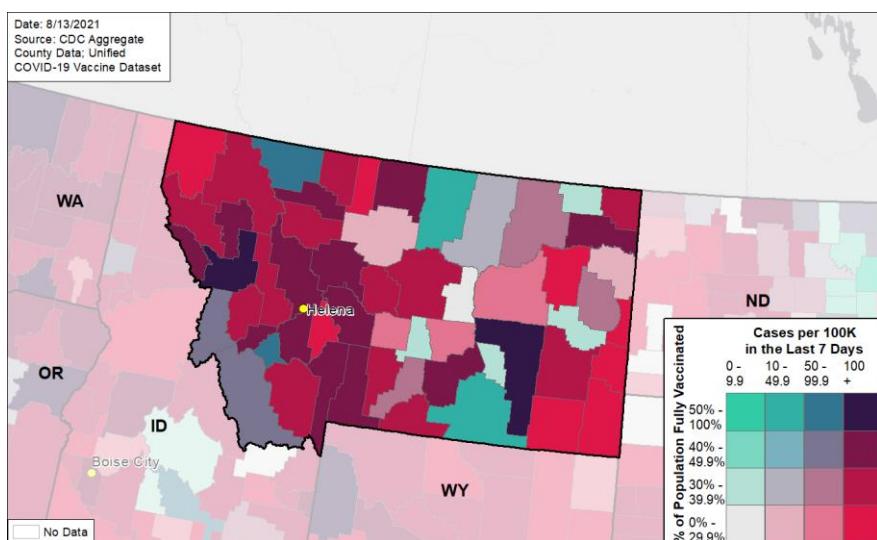

STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	179	+30%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	10.3%	+0.2%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	7.9	+15%
RATE OF NEW COVID-19 DEATHS PER 100,000	0.8	-44%
COMMUNITY TRANSMISSION LEVEL	HIGH TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	540,730 people	50.6% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	514,624 people	61.3% of 18+ pop.
PEOPLE FULLY VACCINATED	479,836 people	44.9% of total pop.
PEOPLE 18+ FULLY VACCINATED	460,771 people	54.8% of 18+ pop.

SARS-CoV-2 Variants of Concern

- Genomic surveillance data from Montana are not available for inclusion in this report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

All Red CBSAs: Beatrice, Columbus, Fremont, Grand Island, Hastings, Kearney, Lincoln, Norfolk, North Platte, Omaha-Council Bluffs, Sioux City

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021. As of 5/26, Nebraska was reporting by Local Health Department instead of county; therefore, after 5/25 no county case data is available and since 6/30, Nebraska is no longer updating their state dashboard, therefore the Nebraska county level community transmission indicator is only based on NAAT positivity.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

NEVADA

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	2 (↑1)	1 (↓1)	0 (0)	14 (0)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (0)	9 (0)

All Blue Counties: Eureka, Esmeralda

All Yellow Counties: Lander

All Red Counties: Clark, Washoe, Lyon, Carson City, Nye, Douglas, Elko, Churchill, Humboldt, Mineral, White Pine, Storey, Lincoln, Pershing

All Red CBSAs: Las Vegas-Henderson-Paradise, Reno, Fernley, Carson City, Pahrump, Gardnerville Ranchos, Elko, Fallon, Winnemucca

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

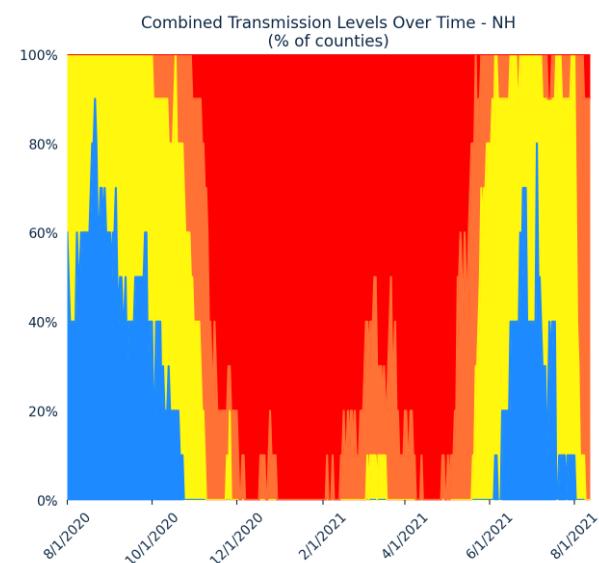

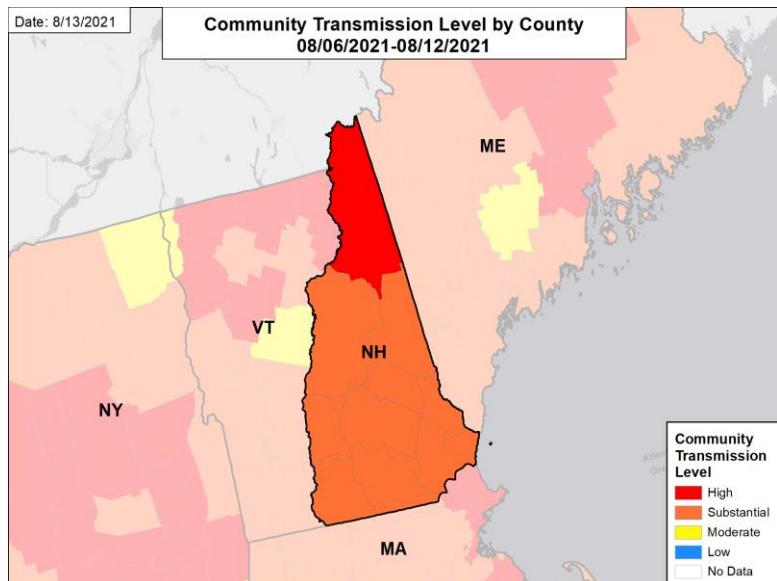

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

NEW JERSEY

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	8 (↓7)	13 (↑7)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	1 (↓3)	6 (↑3)

All Orange Counties: Middlesex, Morris, Passaic, Mercer, Somerset, Hunterdon, Sussex, Warren

All Orange CBSAs: Trenton-Princeton

All Red Counties: Monmouth, Bergen, Essex, Hudson, Ocean, Camden, Burlington, Union, Gloucester, Atlantic, Cape May, Cumberland, Salem

All Red CBSAs: New York-Newark-Jersey City, Philadelphia-Camden-Wilmington, Atlantic City-Hammonton, Ocean City, Vineland-Bridgeton, Allentown-Bethlehem-Easton

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

All Orange CBSAs: Buffalo-Cheektowaga, Jamestown-Dunkirk-Fredonia, Ogdensburg-Massena, Ithaca, Gloversville, Olean, Malone, Batavia, Seneca Falls

All Red Counties: Kings, Queens, New York, Nassau, Suffolk, Bronx, Westchester, Richmond, Monroe, Orange, Onondaga, Rockland, Dutchess, Albany, Saratoga, Oneida, Schenectady, Broome, Ulster, Rensselaer, Oswego, Cayuga, Putnam, Sullivan, Warren, Chemung, Delaware, Herkimer, Chenango, Otsego, Montgomery, Cortland, Tioga, Orleans, Schoharie, Lewis, Hamilton

All Red CBSAs: New York-Newark-Jersey City, Poughkeepsie-Newburgh-Middletown, Rochester, Albany-Schenectady-Troy, Syracuse, Utica-Rome, Binghamton, Kingston, Glens Falls, Auburn, Elmira, Oneonta, Amsterdam, Cortland

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

08.13.2021

NORTH CAROLINA

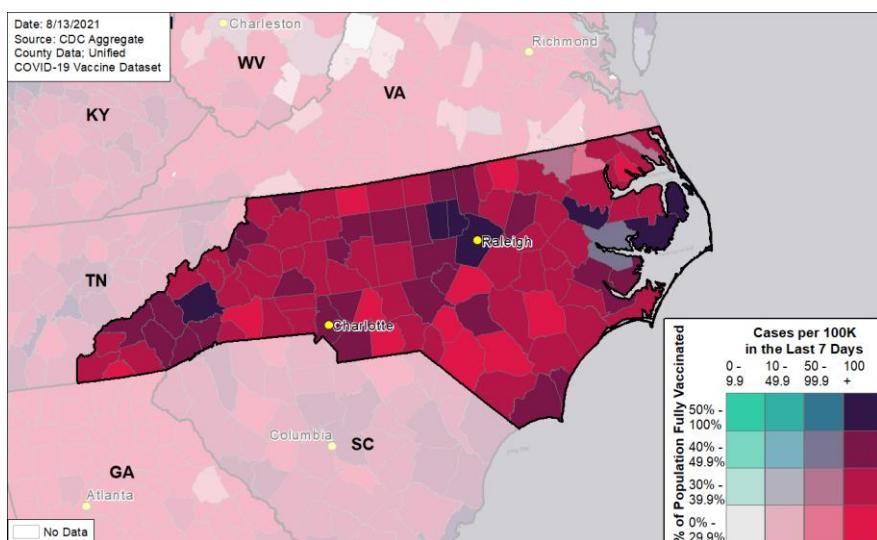

STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	211	-15%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	12.0%	+0.6%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	8.1	+37%
RATE OF NEW COVID-19 DEATHS PER 100,000	0.5	-41%
COMMUNITY TRANSMISSION LEVEL	HIGH TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	5,552,095 people	52.9% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	5,230,207 people	63.9% of 18+ pop.
PEOPLE FULLY VACCINATED	4,670,619 people	44.5% of total pop.
PEOPLE 18+ FULLY VACCINATED	4,441,418 people	54.2% of 18+ pop.

SARS-CoV-2 Variants of Concern

- The following proportions of variants of concern have been identified in [North Carolina](#): B.1.1.7 (Alpha, 13.8%), B.1.351 (Beta, 0.1%), B.1.617.2 (Delta, 69.0%), P.1 (Gamma, 2.9%)

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

All Red CBSAs: Cincinnati, Columbus, Cleveland-Elyria, Dayton-Kettering, Akron, Toledo, Canton-Massillon, Portsmouth, Mansfield, Springfield, Wooster, Mount Vernon, Lima, Sandusky, Huntington-Ashland, Zanesville, Salem, Norwalk, Chillicothe, Wheeling, Wilmington, Ashland, Defiance, Bucyrus-Galion, Weirton-Steubenville, Fremont, Sidney, Marietta, Marion, Wapakoneta, Greenville, Cambridge, Tiffin, Bellefontaine, Celina, Jackson, Urbana, Van Wert, Point Pleasant, Washington Court House

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

STATE PROFILE REPORT | 08.13.2021

CASE RATES, NAAT POSITIVITY, HOSPITAL ADMISSIONS, AND DEATH RATES

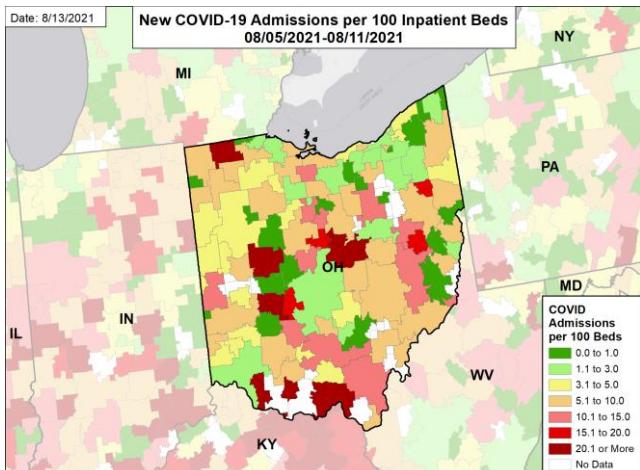

NEW CASES PER 100,000

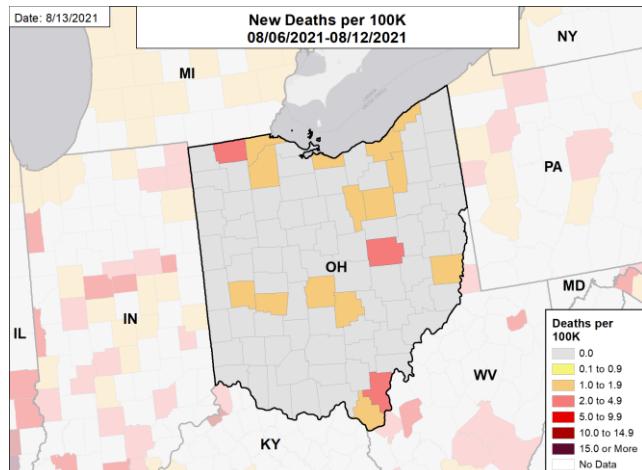

NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY

CONFIRMED NEW COVID-19 ADMISSIONS PER 100 INPATIENT BEDS

NEW DEATHS PER 100,000

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data is through 8/10/2021.

Hospitalizations: Unified Hospitals Dataset in HHS Protect. Totals include only confirmed COVID-19 admissions. Data is through 8/11/2021.

METHODS: Details available on last two pages of report.

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

TERRITORY PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY MUNICIPIO AND METRO AREA

MUNICIPIOS AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF MUNICIPIOS (CHANGE)	0 ($\downarrow 1$)	1 ($\downarrow 6$)	16 ($\downarrow 2$)	61 ($\uparrow 9$)
# OF METRO AREAS (CHANGE)	0 (0)	0 ($\downarrow 2$)	3 ($\uparrow 2$)	9 (0)

All Yellow Municipios: Vieques

All Orange Municipalios: Arecibo, Guayama, Loíza, Yabucoa, Yauco, Aguas Buenas, Utuado, Peñuelas, Orocovis, Jayuya, Florida, Adjuntas, Arroyo, Patillas, Maricao, Culebra

All Orange CBSAs: Ponce, Guayama, Jayuya

All Red Municipalios: San Juan, Bayamón, Carolina, Mayagüez, Guaynabo, Caguas, Aguadilla, Toa Baja, Moca, Ponce, Aguada, Isabela, Toa Alta, Canóvanas, Trujillo Alto, Vega Baja, San Sebastián, Río Grande, Añasco, Dorado, Vega Alta, Humacao, Gurabo, Cabo Rojo, Hatillo, Camuy, Manatí, Fajardo, Cataño, Quebradillas, Juncos, Naranjito, Lares, Corozal, Las Piedras, San Germán, Cayey, Cidra, Rincón, San Lorenzo, Naguabo, Luquillo, Barceloneta, Morovis, Barranquitas, Juana Díaz, Comerío, Villalba, Hormigueros, Aibonito, Salinas, Ciales, Maunabo, Guayanilla, Sabana Grande, Guánica, Coamo, Ceiba, Lajas, Las Marías, Santa Isabel

All Red CBSAs: San Juan-Bayamón-Caguas, Aguadilla-Isabela, Arecibo, Mayagüez, San Germán, Yauco, Coco, Coamo, Santa Isabel

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

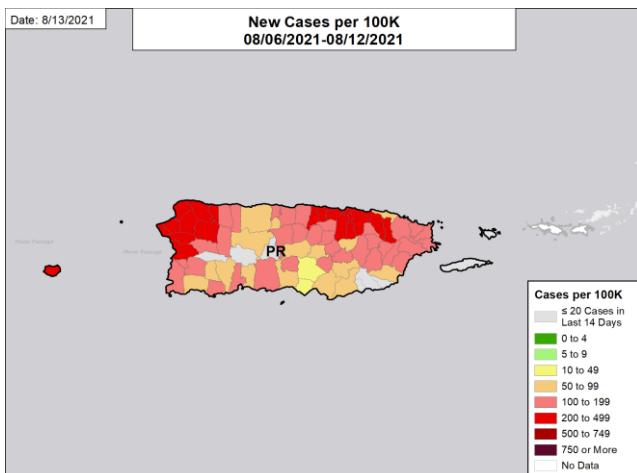

PUERTO RICO

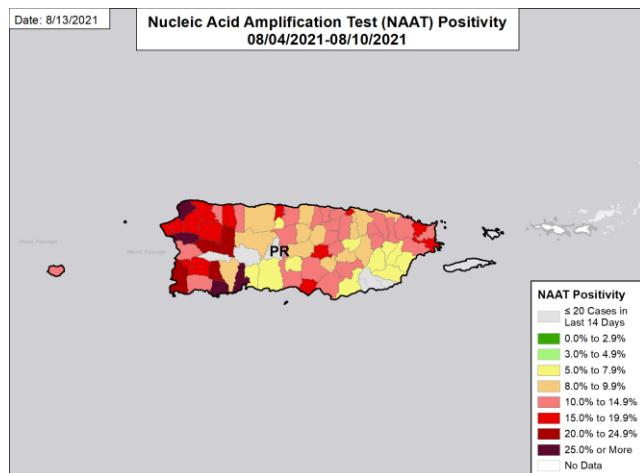

TERRITORY PROFILE REPORT | 08.13.2021

CASE RATES, NAAT POSITIVITY, HOSPITAL ADMISSIONS, AND DEATH RATES

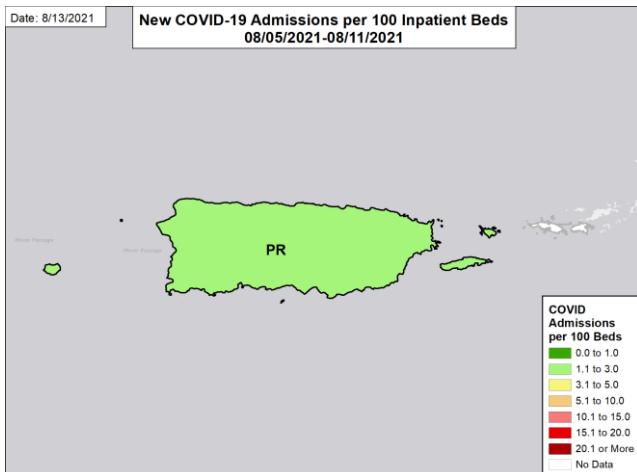

NEW CASES PER 100,000

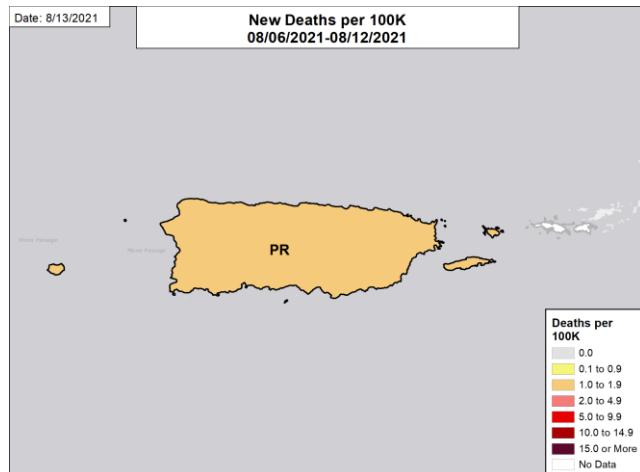

NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY

CONFIRMED NEW COVID-19 ADMISSIONS PER 100 INPATIENT BEDS

NEW DEATHS PER 100,000

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: Municipio-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data is through 8/10/2021.

Hospitalizations: Unified Hospitals Dataset in HHS Protect. Totals include only confirmed COVID-19 admissions. Puerto Rico is shown at the territory level as HSAs are not defined. Data is through 8/11/2021.

METHODS: Details available on last two pages of report.

RHODE ISLAND

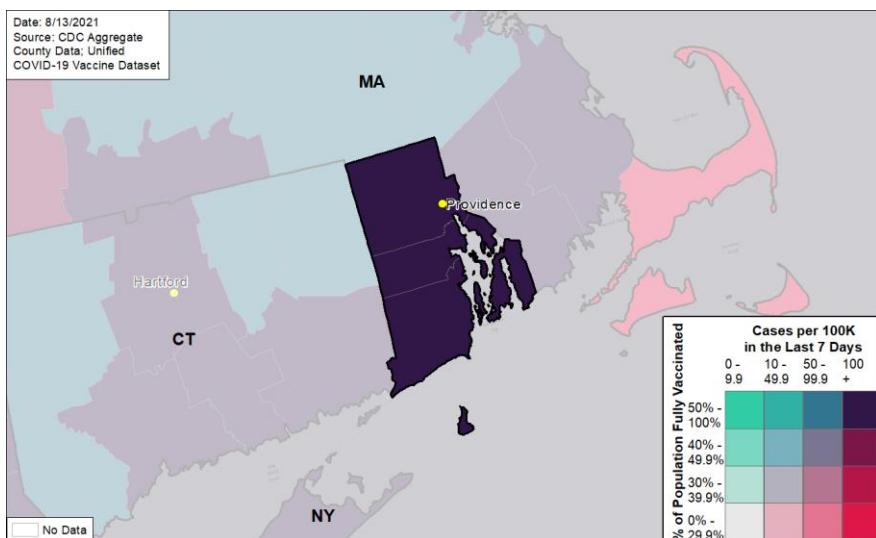

STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	153	+18%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	3.4%	+0.1%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	3.4	+244%
RATE OF NEW COVID-19 DEATHS PER 100,000	0.1	-50%
COMMUNITY TRANSMISSION LEVEL	HIGH TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	731,949 people	69.1% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	686,902 people	80.4% of 18+ pop.
PEOPLE FULLY VACCINATED	662,445 people	62.5% of total pop.
PEOPLE 18+ FULLY VACCINATED	625,272 people	73.1% of 18+ pop.

SARS-CoV-2 Variants of Concern

- Genomic surveillance data from Rhode Island are not available for inclusion in this report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

* Indicates absolute change in percentage points.

** Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

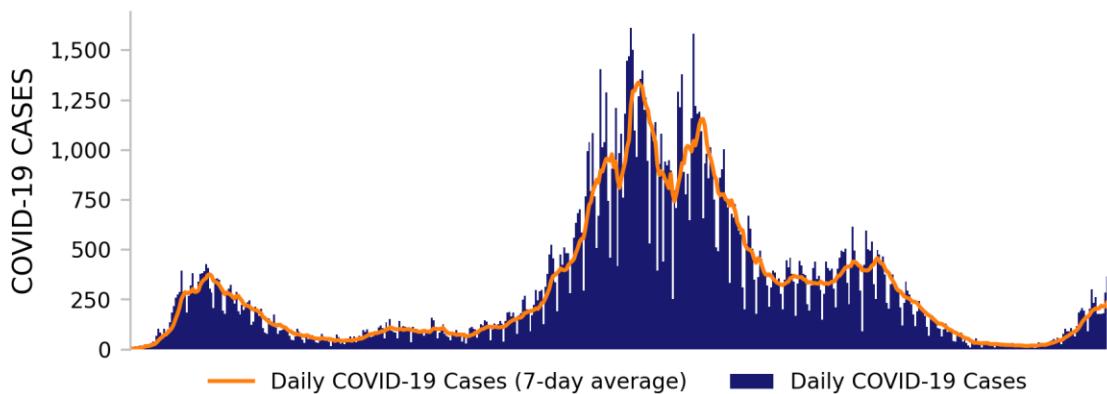

DATA SOURCES**Note:** Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.**Cases and Deaths:** State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data is through 8/12/2021; previous week is from 7/30 to 8/5.**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 8/10/2021; previous week is from 7/28 to 8/3. Test volume through 8/6/2021; previous week is from 7/24 to 7/30.**Admissions:** Unified Hospitals Dataset in HHS Protect. Data is through 8/11, previous week is from 7/29 to 8/4.**Shortages:** Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 8/11/2021 for staffing and the week ending 8/11/2021 for supplies.**Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range. **METHODS:** Details available on last two pages of report.

County reporting completeness for South Dakota is 83.7%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

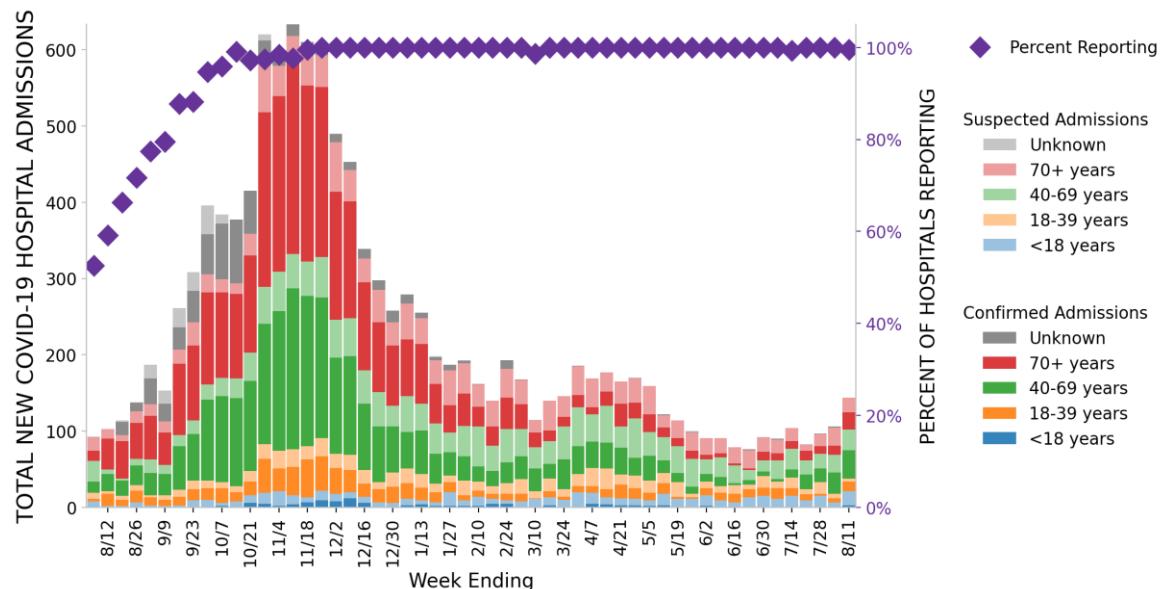

SOUTH DAKOTA

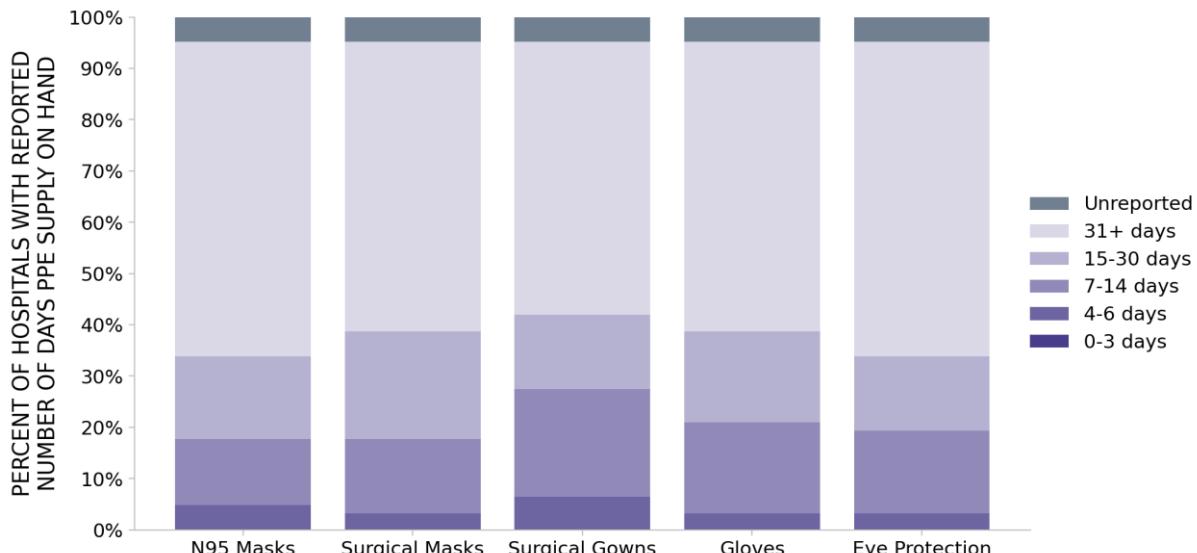

STATE PROFILE REPORT | 08.13.2021

62 hospitals are expected to report in South Dakota

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

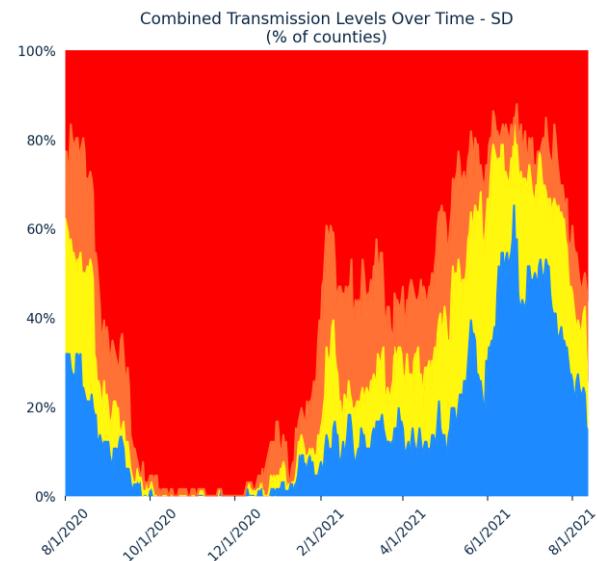

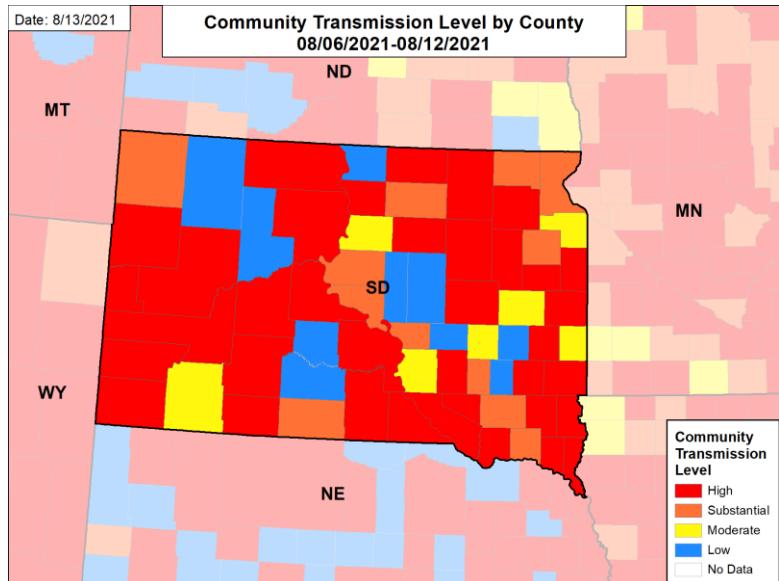

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

SOUTH DAKOTA

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	10 (↓8)	7 (↓1)	12 (↑4)	37 (↑5)
# OF METRO AREAS (CHANGE)	0 (0)	1 (↓1)	2 (↓1)	9 (↑2)

All Blue Counties: Hyde, Perkins, Miner, Mellette, Jones, Jerauld, Hanson, Hand, Campbell, Ziebach

All Yellow Counties: Oglala Lakota, Moody, Grant, Potter, Brule, Kingsbury, Sanborn

All Yellow CBSAs: Mitchell

All Orange Counties: Codington, Hughes, Davison, Todd, Roberts, Marshall, Hutchinson, Yankton, Edmunds, Sully, Buffalo, Harding

All Orange CBSAs: Pierre, Yankton

All Red Counties: Minnehaha, Pennington, Lincoln, Brookings, Meade, Brown, Lawrence, Dewey, Custer, Union, Fall River, Butte, Deuel, Lake, Beadle, Corson, Hamlin, Charles Mix, Aurora, Gregory, Bennett, Lyman, Tripp, Jackson, Stanley, Turner, Clay, Spink, Haakon, McCook, Douglas, Faulk, Walworth, Bon Homme, Day, Clark, McPherson

All Red CBSAs: Sioux Falls, Rapid City, Brookings, Watertown, Aberdeen, Spearfish, Sioux City, Huron, Vermillion

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

PEOPLE 18+ FULLY VACCINATED	1,367,866 people	60.1% of 18+ pop.

SARS-CoV-2 Variants of Concern

- The following proportions of variants of concern have been identified in [Utah](#): B.1.1.7 (Alpha, 4.5%), B.1.617.2 (Delta, 85.7%), P.1 (Gamma, 2.5%)

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

PERCENT OF 18+ POPULATION FULLY VACCINATED**PERCENT OF 65+ POPULATION FULLY VACCINATED****DATA SOURCES**

County reporting completeness for Vermont is 73.7%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

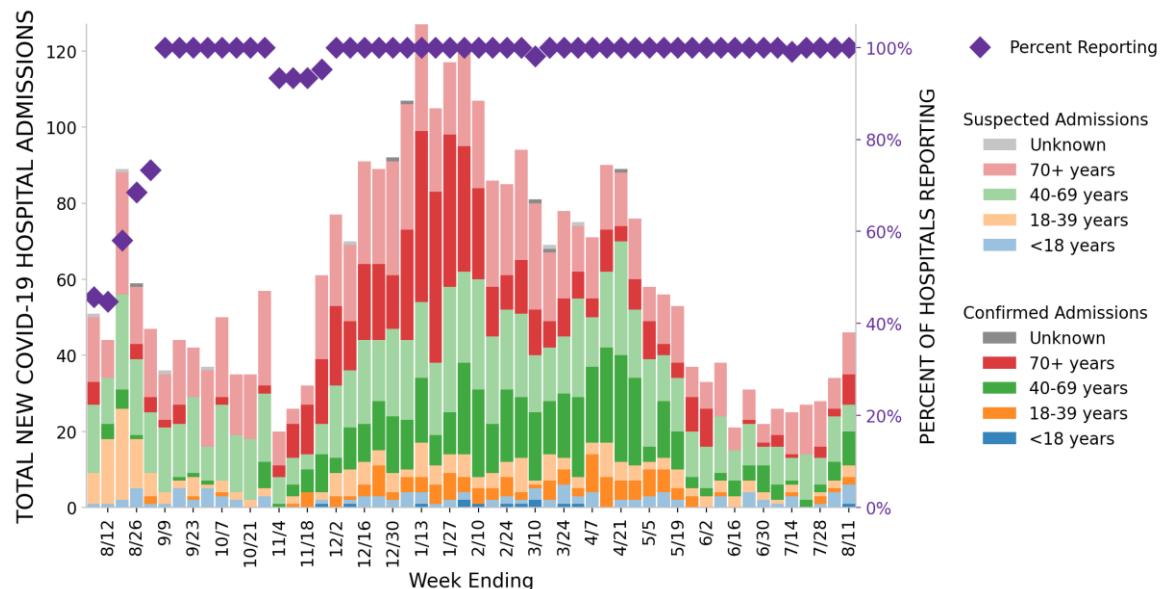

VERMONT

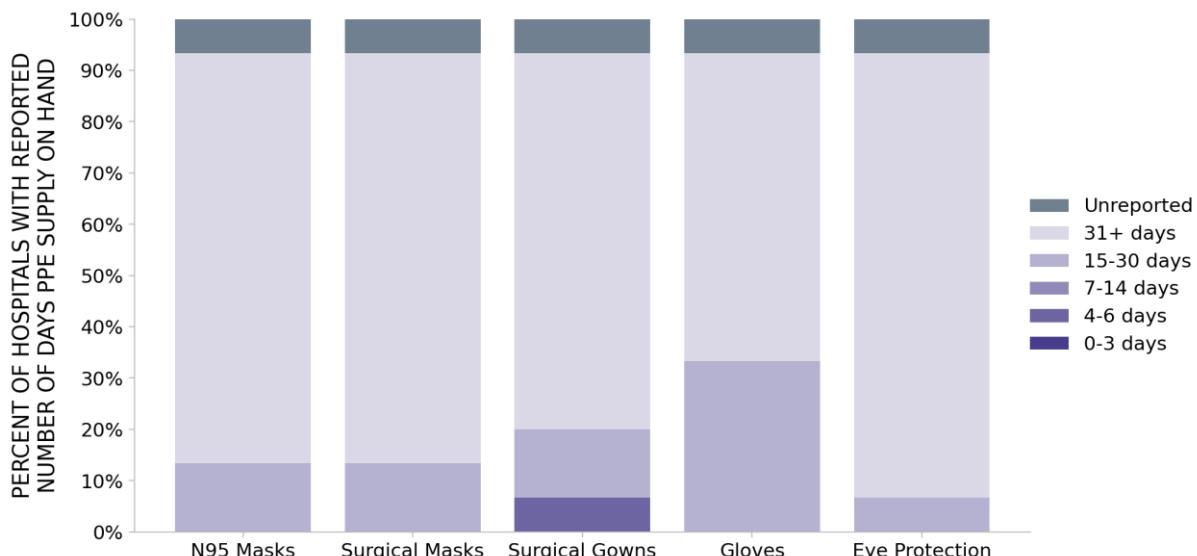

STATE PROFILE REPORT | 08.13.2021

15 hospitals are expected to report in Vermont

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

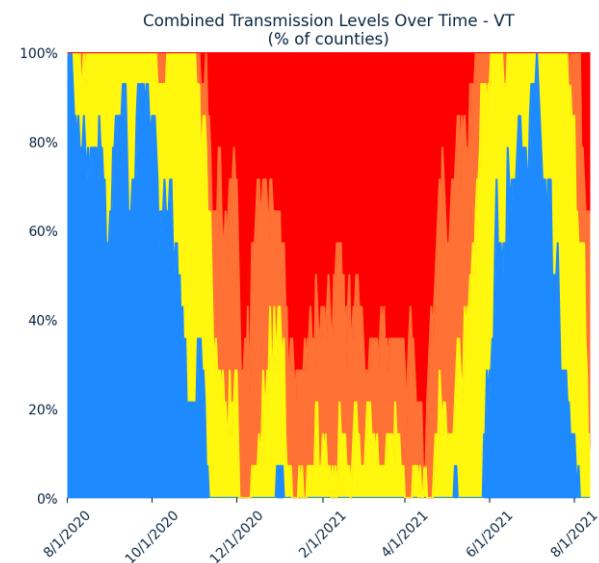

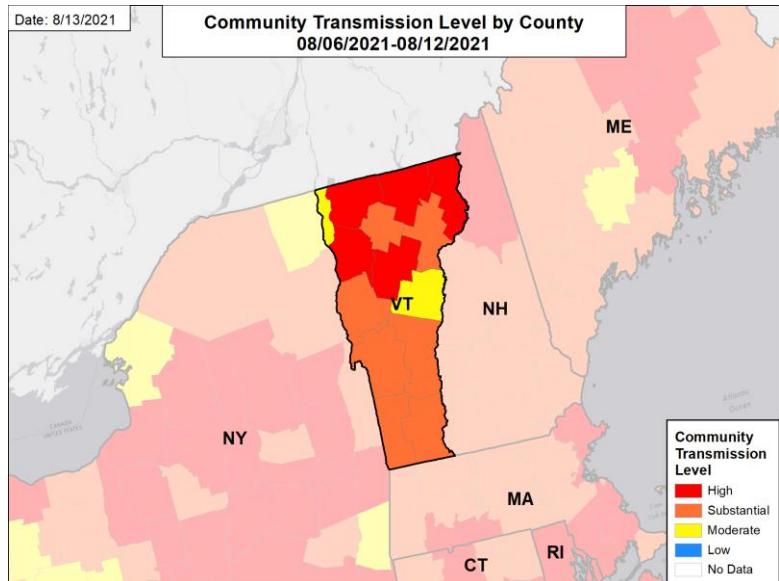

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	2 (↓6)	7 (↑1)	5 (↑5)
# OF METRO AREAS (CHANGE)	0 (0)	0 (↓1)	3 (↓1)	2 (↑2)

All Yellow Counties: Orange, Grand Isle

All Orange Counties: Windsor, Rutland, Windham, Bennington, Caledonia, Addison, Lamoille

All Orange CBSAs: Lebanon, Rutland, Bennington

All Red Counties: Chittenden, Washington, Franklin, Orleans, Essex

All Red CBSAs: Burlington-South Burlington, Barre

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to

- Cases and Deaths:** County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.
- Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Data is through 8/10/2021.
- Hospitalizations:** Unified Hospitals Dataset in HHS Protect. Totals include only confirmed COVID-19 admissions. Data is through 8/11/2021.
- METHODS:** Details available on last two pages of report.

STATE PROFILE REPORT

08.13.2021

WEST VIRGINIA

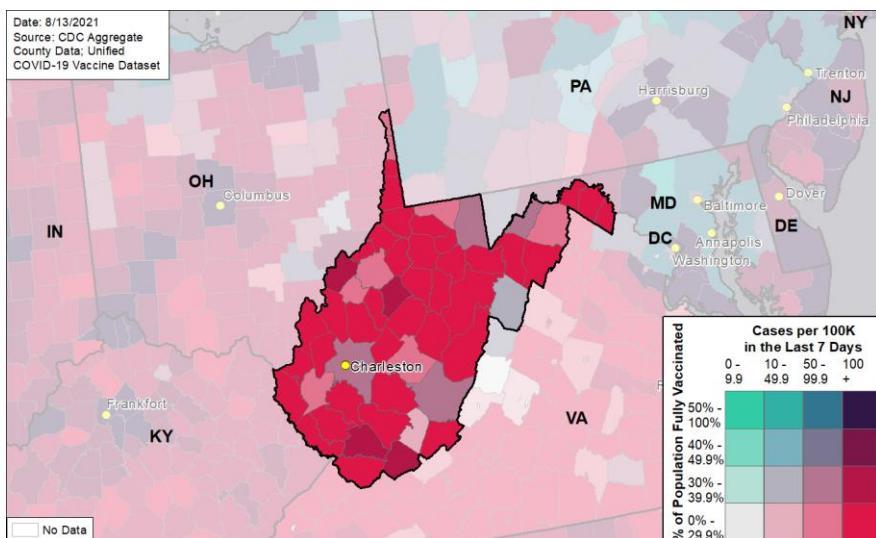

STATE SYNOPSIS

	LAST WEEK	CHANGE FROM PREVIOUS WEEK
RATE OF NEW COVID-19 CASES PER 100,000	166	+50%
NUCLEIC ACID AMPLIFICATION TEST (NAAT) POSITIVITY RATE	8.5%	+1.2%
NEW CONFIRMED COVID-19 HOSPITAL ADMISSIONS / 100 BEDS	5.0	+52%
RATE OF NEW COVID-19 DEATHS PER 100,000	0.8	-18%
COMMUNITY TRANSMISSION LEVEL	HIGH TRANSMISSION	
PEOPLE RECEIVED AT LEAST 1 DOSE	832,076 people	46.4% of total pop.
PEOPLE 18+ RECEIVED AT LEAST 1 DOSE	792,184 people	55.3% of 18+ pop.
PEOPLE FULLY VACCINATED	703,868 people	39.3% of total pop.
PEOPLE 18+ FULLY VACCINATED	675,794 people	47.2% of 18+ pop.

SARS-CoV-2 Variants of Concern

- Genomic surveillance data from West Virginia are not available for inclusion in this report.

COVID-19 Reported Cases per 100,000 Population (last 7 days) and Percent of Total Population Fully Vaccinated

The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state, and local levels. We recognize that data at the state level may differ from that available at the federal level. Our objective is to use consistent data sources and methods that allow for comparisons to be made across localities. We appreciate your continued support in identifying data discrepancies and improving data completeness and sharing across systems. We look forward to your feedback. All inquiries and requests for information should be directed to <https://www.cdc.gov/dcs>ContactUs/Form>.

* Indicates absolute change in percentage points.

** Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

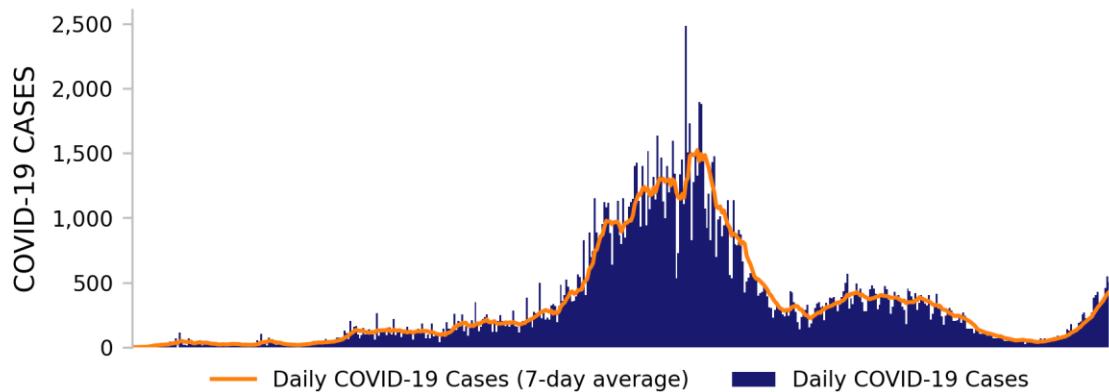

DATA SOURCES**Note:** Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.**Cases and Deaths:** State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data is through 8/12/2021; previous week is from 7/30 to 8/5.**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 8/10/2021; previous week is from 7/28 to 8/3. Test volume through 8/6/2021; previous week is from 7/24 to 7/30.**Admissions:** Unified Hospitals Dataset in HHS Protect. Data is through 8/11, previous week is from 7/29 to 8/4.**Shortages:** Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 8/11/2021 for staffing and the week ending 8/11/2021 for supplies.**Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range. **METHODS:** Details available on last two pages of report.

PERCENT OF 18+ POPULATION FULLY VACCINATED**PERCENT OF 65+ POPULATION FULLY VACCINATED****DATA SOURCES**

County reporting completeness for West Virginia is 57.8%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

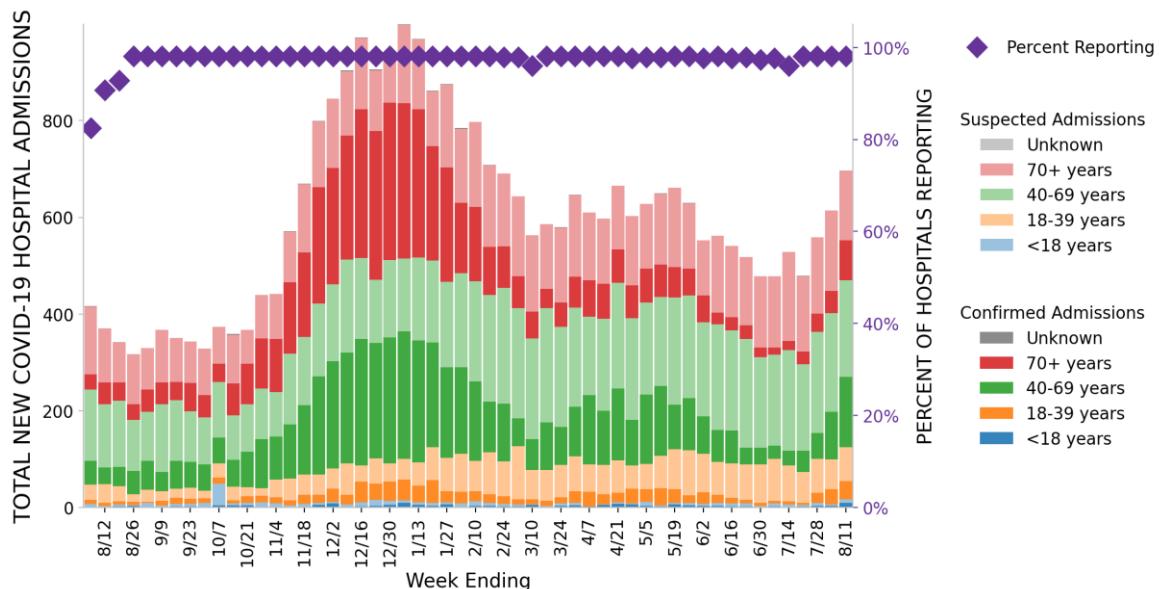

WEST VIRGINIA

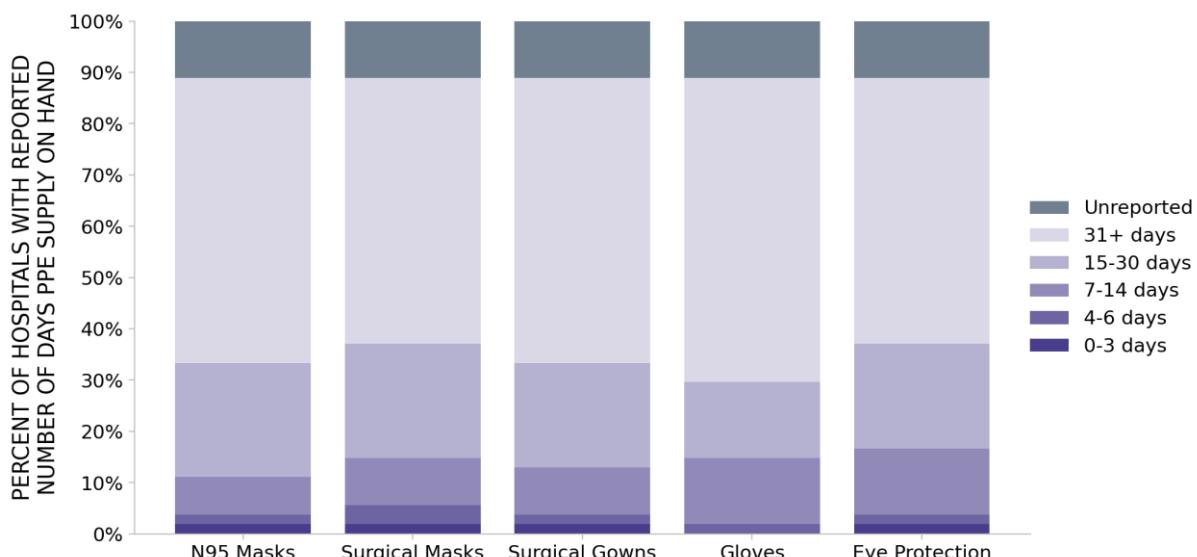

STATE PROFILE REPORT | 08.13.2021

54 hospitals are expected to report in West Virginia

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

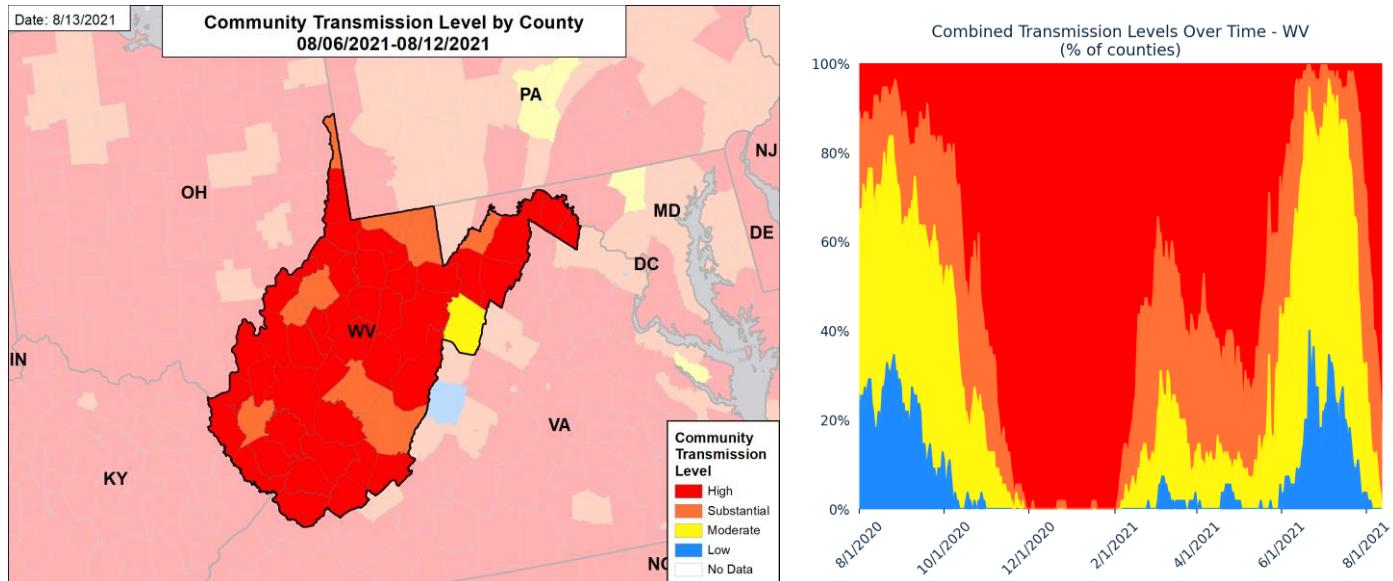

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

WEST VIRGINIA

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	1 (↓6)	10 (↓11)	44 (↑17)
# OF METRO AREAS (CHANGE)	0 (0)	0 (↓1)	1 (↓8)	16 (↑9)

All Yellow Counties: Pendleton

All Orange Counties: Monongalia, Greenbrier, Hancock, Nicholas, Preston, Mineral, Brooke, Lincoln, Ritchie, Wirt

All Orange CBSAs: Morgantown

All Red Counties: Berkeley, Cabell, Kanawha, Wood, Raleigh, Upshur, Wayne, Putnam, Mercer, Marshall, Harrison, Randolph, Marion, Ohio, Logan, Wetzel, Jefferson, Lewis, Mason, Taylor, Fayette, Mingo, Jackson, Wyoming, Boone, Barbour, McDowell, Gilmer, Hampshire, Pocahontas, Monroe, Roane, Morgan, Tyler, Pleasants, Braxton, Hardy, Grant, Summers, Clay, Calhoun, Webster, Doddridge, Tucker

All Red CBSAs: Huntington-Ashland, Charleston, Hagerstown-Martinsburg, Beckley, Wheeling, Parkersburg-Vienna, Clarksburg, Bluefield, Elkins, Fairmont, Mount Gay-Shamrock, Washington-Arlington-Alexandria, Point Pleasant, Weirton-Steubenville, Winchester, Cumberland

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

PEOPLE 12-17 INITIATING VACCINATION (PERCENT OF POPULATION)	677 (1.5%)	+3.4%	25,148 (2.5%)	643,601 (2.5%)
PEOPLE 18+ INITIATING VACCINATION (PERCENT OF POPULATION)	2,850 (0.6%)	-12.3%	80,704 (0.9%)	2,672,293 (1.0%)

* Indicates absolute change in percentage points.

** Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.

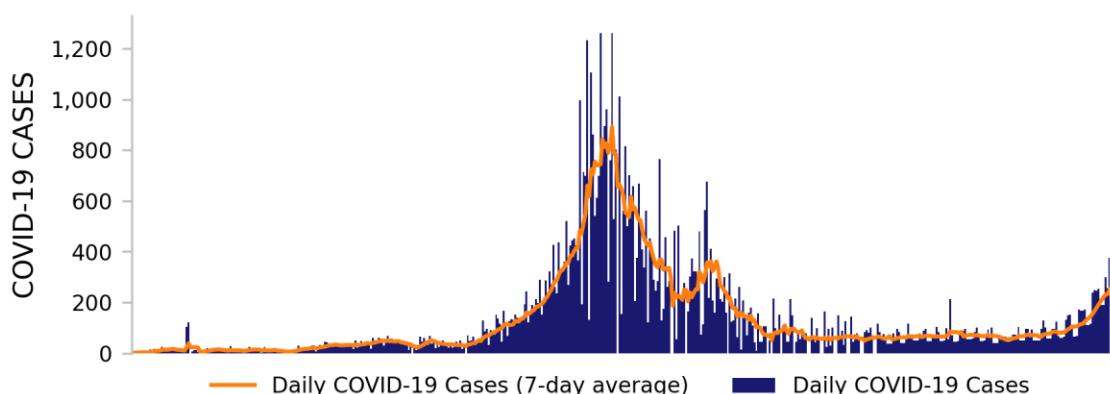

DATA SOURCES**Note:** Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.**Cases and Deaths:** State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data is through 8/12/2021; previous week is from 7/30 to 8/5.**Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods. Test positivity through 8/10/2021; previous week is from 7/28 to 8/3. Test volume through 8/6/2021; previous week is from 7/24 to 7/30.**Admissions:** Unified Hospitals Dataset in HHS Protect. Data is through 8/11, previous week is from 7/29 to 8/4.**Shortages:** Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 8/11/2021 for staffing and the week ending 8/11/2021 for supplies.**Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. People initiating vaccination include those who have received the first dose of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Population denominators reflect the subset of the population of the corresponding age range. **METHODS:** Details available on last two pages of report.

County reporting completeness for Wyoming is 96.4%.

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order.

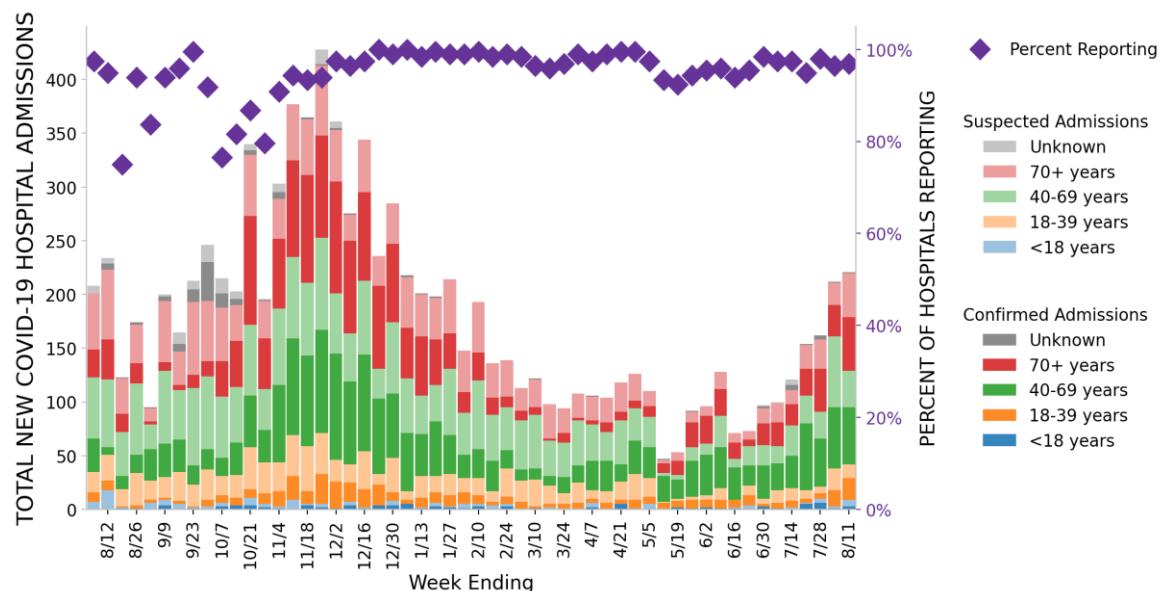

WYOMING

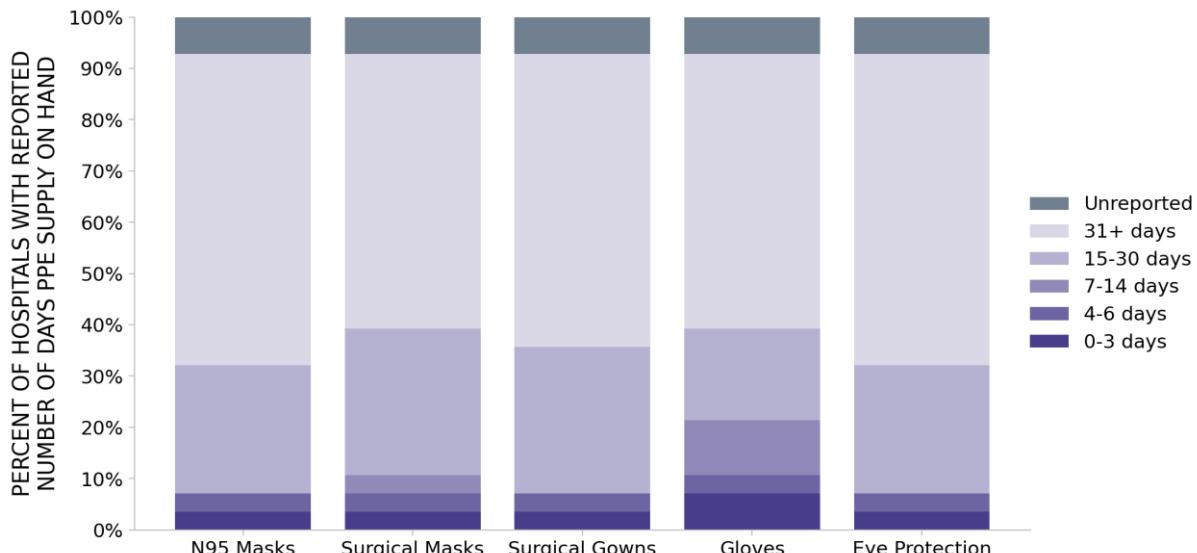

STATE PROFILE REPORT | 08.13.2021

28 hospitals are expected to report in Wyoming

HOSPITAL ADMISSIONS

HOSPITAL PPE SUPPLIES

DATA SOURCES

Hospitalizations: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is through 8/11/2021.

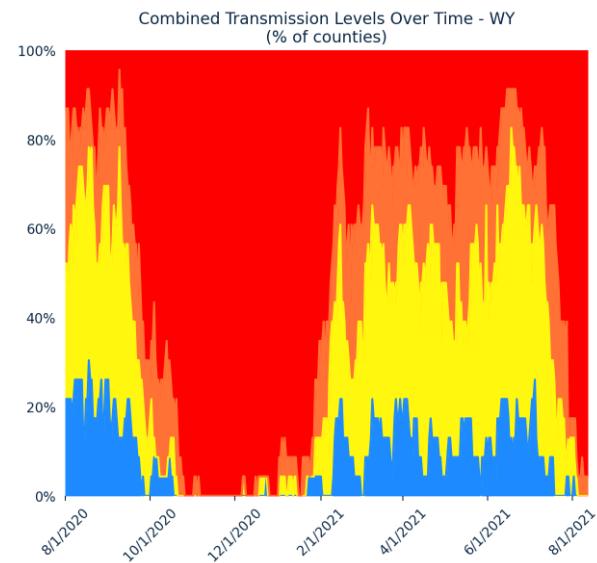

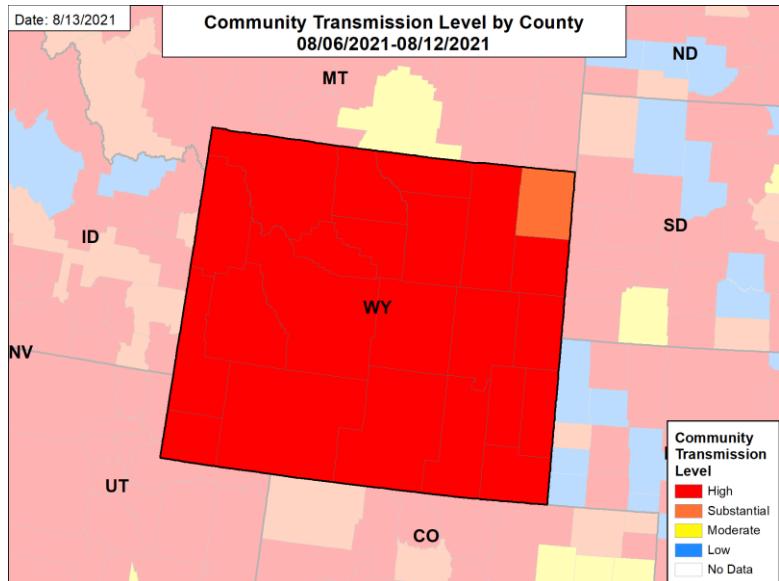

PPE: Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Values presented show the latest reports from hospitals in the week ending 8/11/2021.

METHODS: Details available on last two pages of report.

WYOMING

STATE PROFILE REPORT | 08.13.2021 COMMUNITY TRANSMISSION BY COUNTY AND METRO AREA

COUNTIES AND METRO AREAS BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	0 (0)	0 (0)	1 (0)	22 (0)
# OF METRO AREAS (CHANGE)	0 (0)	0 (0)	0 (0)	9 (0)

All Orange Counties: Crook

All Red Counties: Laramie, Natrona, Campbell, Fremont, Teton, Park, Sheridan, Uinta, Albany, Carbon, Sweetwater, Converse, Lincoln, Platte, Goshen, Big Horn, Johnson, Washakie, Weston, Niobrara, Sublette, Hot Springs

All Red CBSAs: Cheyenne, Casper, Gillette, Riverton, Jackson, Sheridan, Evanston, Laramie, Rock Springs

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 8/10/2021.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

PEOPLE 65+ RECEIVED AT LEAST ONE DOSE	49,634,038 90.5% of 65+ pop.	PEOPLE 65+ FULLY VACCINATED	44,103,158 80.4% of 65+ pop.

DAILY NATIONAL COUNT OF VACCINE DOSES ADMINISTERED BY DATE OF ADMINISTRATION

DATA SOURCES

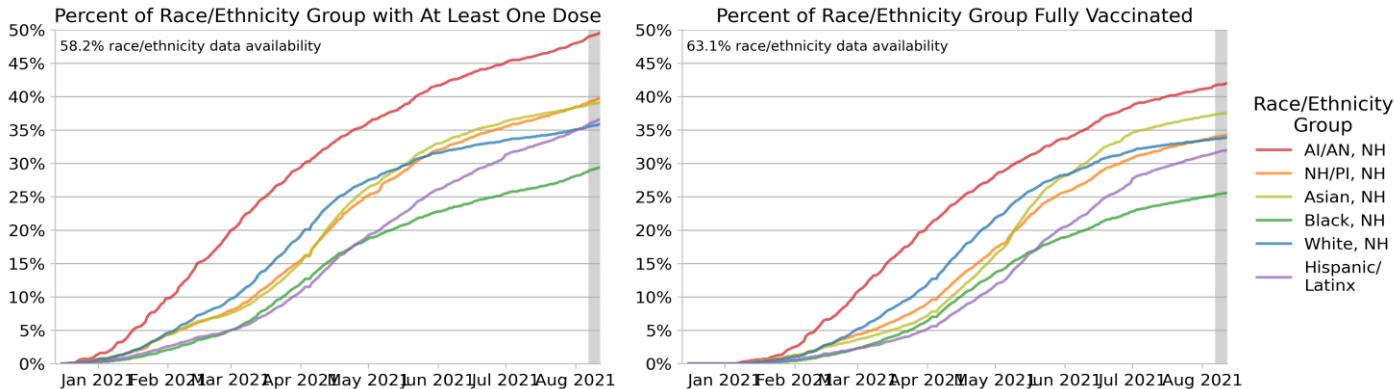

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter blue coloring in the Daily National Count figure) may be an underestimate of the actual value.

METHODS: Details available on last two pages of report.

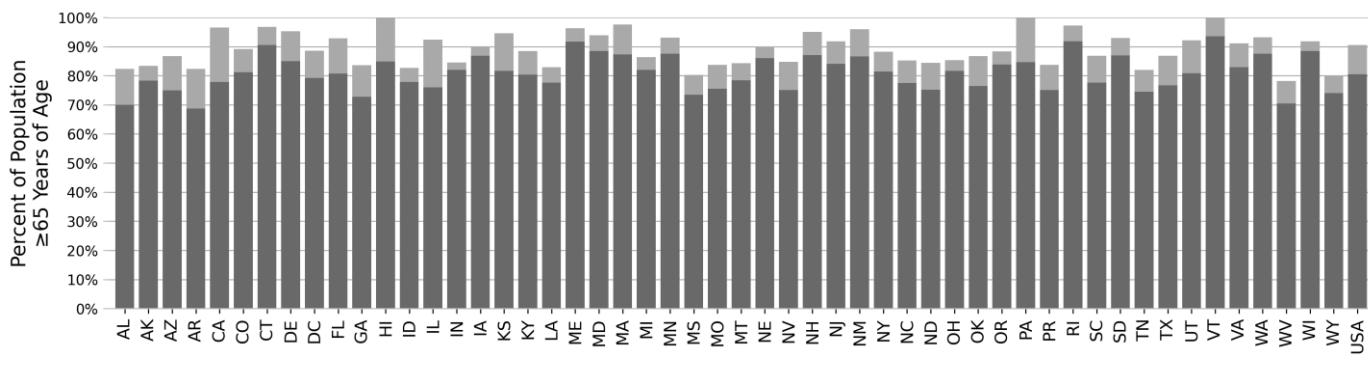

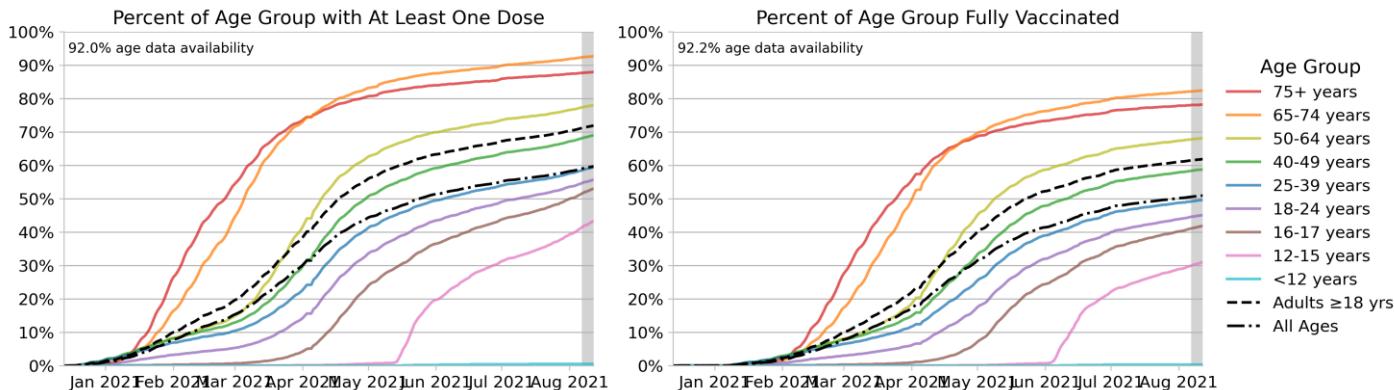

National Picture: Vaccinations

NATIONAL SUMMARY OF VACCINATIONS BY RACE/ETHNICITY

NATIONAL SUMMARY OF VACCINATIONS BY AGE

DATA SOURCES

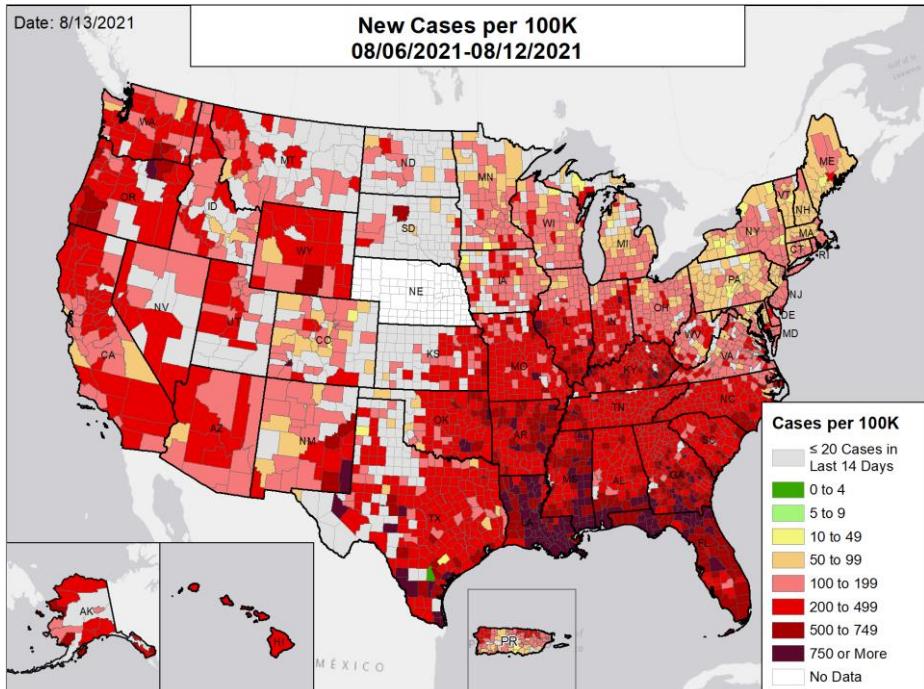

Vaccinations: [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. Race/Ethnicity data were available for 58.2% receiving at least one dose and 63.1% fully vaccinated. Age data were available for 92.0% receiving at least one dose and 92.2% fully vaccinated. Texas does not report demographic-specific dose number information to CDC, so data for Texas are not represented in demographic trends figures. "NH" stands for Non-Hispanic/Latinx, "AI/AN" stands for American Indian or Alaska Native, and "NH/PI" stands for Native Hawaiian or Pacific Islander.

METHODS: Details available on last two pages of report.

DATA SOURCES

Maps and figures reflect 7-day average of data from 8/6-8/12 (cases), 8/4-8/10 (tests).

Note: Most recent days may have incomplete reporting.

Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 8/12/2021. As of 6/4, Florida is only updating their county case data on Fridays, therefore values for the last week may be an underestimate. As of 5/26, Nebraska was reporting by Local Health Department instead of county; therefore, after 5/25 no county case data is available and since 6/30, Nebraska is no longer updating their state dashboard, therefore the Nebraska county level community transmission indicator is only based on NAAT positivity.

Testing: Combination of CELR (COVID-19 Electronic Lab Reporting) state health department-reported data and HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs). Data is through 8/10/2021.

County Percentages: Based on a denominator of 3,220 county/county-equivalents, including states, the District of Columbia, and Puerto Rico municipios.

Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).

METHODS: Details available on last two pages of report.

DATA SOURCES & METHODS

STATE PROFILE REPORT | 08.13.2021

- Some dates may have incomplete data due to delays and/or differences in state reporting. Data may be backfilled over time, resulting in week-to-week changes between reports. It is critical that states provide as up-to-date data as possible. Figures and values may also differ from state reports due to differing methodologies.
- All population values are vintage 2019 US Census data.
- **Cases and Deaths:** County-level data is from a CDC-managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Data and week-on-week changes are as of 11:48 EDT on 08/13/2021. Cases and deaths are generally shown by date of report. Some states periodically adjust their past data with CDC to show it by case date and death date, as determined by the state. Between adjustments, new cases and deaths continue to be shown by date of report. This can potentially lead to over-estimates of the week-on-week increases in cases or deaths.
 - As of 6/4/21, Florida is only updating their county case data on Fridays, therefore values for the last week may be an underestimate. As of 6/5/21, Florida is no longer updating their county death data, therefore after 6/4 no county death data is available. As of 6/30/21, Nebraska is no longer updating their state dashboard and since 5/26, Nebraska was reporting by Local Health Department instead of county; therefore, after 5/25 no county case and death data is available. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. Puerto Rico deaths are shown at the territory level as deaths are not reported at the municipio level.
 - Historical reports of cases and deaths — for which backfill dates are not available — that exceed 1% of the total new cases or deaths reported in the US that day have been excluded from state daily and weekly trends. However, these are still present in county-level data. Historical reports in the last two weeks (7/30/21 – 8/12/21) are:
 - Colorado cases: 357 on 7/30; 106 on 8/2; 426 on 8/3; 307 on 8/4; 431 on 8/5; 340 on 8/6; 303 on 8/9; 304 on 8/10; 279 on 8/11; and 365 on 8/12
 - Connecticut cases: 152 on 8/5
 - Delaware deaths: 130 on 7/30
 - District of Columbia cases: 6 on 8/2 and 19 on 8/9
 - Indiana cases: 45 on 8/5
 - Michigan deaths: 1 on 8/9 and 12 on 8/11
 - Mississippi deaths: 4 on 8/1; 13 on 8/2; 2 on 8/5; 15 on 8/8; 14 on 8/9; and 10 on 8/11
 - Texas cases: 334 on 7/30; 164 on 7/31; 44 on 8/1; 19 on 8/2; 322 on 8/3; 333 on 8/4; 82 on 8/5; 7,773 on 8/6; 99 on 8/7; 42 on 8/8; 63 on 8/9; 183 on 8/10; 270 on 8/11; and 266 on 8/12
- **Testing:** The data presented represent viral COVID-19 laboratory diagnostic and screening test results — not individual people — and exclude antibody and antigen tests, unless stated otherwise. The term Nucleic Acid Amplification Test (NAAT) includes RT-PCR and other testing methods, which were always included in the testing data. CELR (COVID-19 Electronic Lab Reporting) state health department-reported data are used to describe county-level viral COVID-19 NAAT result totals when information is available on patients' county of residence or healthcare providers' practice location. HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) are used otherwise. Because the data are deidentified, total NAATs are the number of tests performed, not the number of individuals tested. NAAT positivity rate is the number of positive tests divided by the number of tests performed and resulted. For test positivity, last week data are from 8/4 to 8/10; previous week data are from 7/28 to 8/3; the week one month before data are from 7/7 to 7/13. For number of tests, last week data are from 7/31 to 8/6; previous week data are from 7/24 to 7/30. HHS Protect data is recent as of 10:12 EDT on 08/13/2021. Testing data are inclusive of everything received and processed by the CELR system as of 19:00 EDT on 08/12/2021.
- **Hospitalizations:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. In addition, hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. The data presented represents raw data provided; we are working diligently with state liaisons to improve reporting consistency. Data is recent as of 10:19 EDT on 08/13/2021.
- **Hospital PPE:** Unified Hospitals Dataset in HHS Protect. This figure may differ from state data due to differences in hospital lists and reporting between federal and state systems. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is recent as of 10:11 EDT on 08/13/2021.
- **State, County, and Metro Area Community Transmission Levels**
 - **High Transmission:** Those states, CBSAs, and counties that during the last week reported 100 or more cases per 100,000 population or a lab test positivity at or above 10.0%.
 - **Substantial Transmission:** Those states, CBSAs, and counties that during the last week reported from 50 to 99 cases per 100,000 population or a lab test positivity from 8.0% to 9.9%.
 - **Moderate Transmission:** Those states, CBSAs, and counties that during the last week reported from 10 to 49 cases per 100,000 population or a lab test positivity from 5.0% to 7.9%.
 - **Low Transmission:** Those states, CBSAs, and counties that during the last week reported from 0 to 9 cases per 100,000 population or a lab test positivity from 0.0% to 4.9%.
 - If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See [CDC COVID Data Tracker](#).
- **Shortages:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Includes hospitals currently reporting a staffing shortage. Low supply is defined as a hospital reporting they are not able to maintain a 3-day supply of N95s, face masks, gloves, gowns, or eye protection. Data is recent as of 10:11 EDT on 08/13/2021.
- **Vaccinations:** [CDC COVID Data Tracker](#). Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 10:11 EDT on 08/13/2021. Data last updated 06:00 EDT on 08/13/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. COVID-19 vaccines available in the U.S. are authorized only for persons ≥ 12 years of age (Pfizer-BioNTech) or ≥ 18 years of age (Moderna and J&J/Janssen). Population denominators reflect the subset of the population of the corresponding age range when specified (e.g., 12+, 12-17, 18+, or 65+), otherwise the total population is used. The following states have $\leq 80\%$ completeness reporting vaccinations by county, which may result in underestimates of vaccination data for counties: VT (74%), WV (58%), GA (55%), VA (51%), TX (0%), and HI (0%).
- **Variants:** Data from [CDC COVID Data Tracker](#). Variant proportions are based on representative CDC sequence data (NS3 + CDC-funded contract sequencing) collected over a 4-week period ending July 17, 2021 for states with at least 300 sequences. Proportions are calculated using empirical (unweighted) data, which are subject to change over time and will be updated as more data become available. Proportions of variants do not represent the total number that may be circulating in the United States and may not match cases reported by states, territories, tribes, and local officials. For states and jurisdictions not listed, CDC has insufficient genomic surveillance data for the specified time period. Data updated by 19:00 ET on 8/10. Data pulled 17:30 EDT on 08/12/2021.

DATA SOURCES & METHODS

STATE PROFILE REPORT | 08.13.2021

Color threshold values are rounded before color classification

Metric	Dark Green	Light Green	Yellow	Orange	Light Red	Red	Dark Red	Darkest Red
New cases per 100,000 population per week	≤4	5 – 9	10 – 49	50 – 99	100 – 199	200 – 499	500 – 749	≥750
Percent change in new cases per 100,000 population	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 99%	100% – 999%	≥1000%	
Diagnostic test result positivity rate	≤2.9%	3.0% – 4.9%	5.0% – 7.9%	8.0% – 9.9%	10.0% – 14.9%	15.0% – 19.9%	20.0% – 24.9%	≥25.0%
Change in test positivity	≤-2.1%	-2.0% – -0.6%	-0.5% – 0.0%	0.1% – 0.5%	0.6% – 2.0%		≥2.1%	
Total diagnostic tests resulted per 100,000 population per week	≥5000	3000 – 4999	2000 – 2999	1000 – 1999	500 – 999		≤499	
Percent change in tests per 100,000 population	≥26%	11% – 25%	1% – 10%	-10% – 0%	-25% – -11%		≤-26%	
COVID-19 deaths per 100,000 population per week	0.0		0.1 – 0.9	1.0 – 1.9	2.0 – 4.9	5.0 – 9.9	10.0 – 14.9	≥15.0
Percent change in deaths per 100,000 population	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 25%		≥26%	
Confirmed and suspected new COVID-19 hospital admissions per 100 beds	≤2.0	2.1 – 5.0	5.1 – 10.0	10.1 – 15.0	15.1 – 20.0	20.1 – 25.0	≥25.1	
Confirmed new COVID-19 hospital admissions per 100 beds	≤1.0	1.1 – 3.0	3.1 – 5.0	5.1 – 10.0	10.1 – 15.0	15.1 – 20.0	≥20.1	
Change in new COVID-19 hospital admissions per 100 beds	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 25%		≥26%	
Percent of hospitals with supply/staff shortages	≤9%		10% – 19%	20% – 29%	30% – 39%		≥40%	
Change in percent of hospitals with supply/staff shortages	≤-10%	-9% – -5%	-4% – 0%	1% – 4%	5% – 9%		≥10%	
Percent of Population Fully Vaccinated (State Level)	0.0 – 39.9%		40.0 – 44.9%	45.0 – 49.9%	50.0 – 54.9%	≥55.0%
